Dear [REDACTED]

Thank you for your information request. I am responding as the matters you raise fall within the scope of my role.

To confirm, all garden waste collected as part of Council's new green waste service will go to Composting NZ in Kapiti, to be turned into compost.

Kind regards

**Jörn Scherzer**

Official Information Requests OIA

Dear Ms Miller

I note "Hutt City Council is set to reduce its carbon footprint with the installation of a flare that will cut methane emissions at its Silverstream Landfill.

The flare will burn off methane, created by the breakdown of organic waste, before it reaches the atmosphere...". Feb 2021

Is the optional green waste collection from 1 July 2021 to be methane-burnt in the Silverstream plant?

If not, where? And will an alternative disposal site/s be required to methane-burn post-July green waste?

Thank you
