

# Quarterly Wainuiomata Environmental Report for the CLG (November 2021 - January 2022)

## Material accepted

Total material received in quarter is provided below.

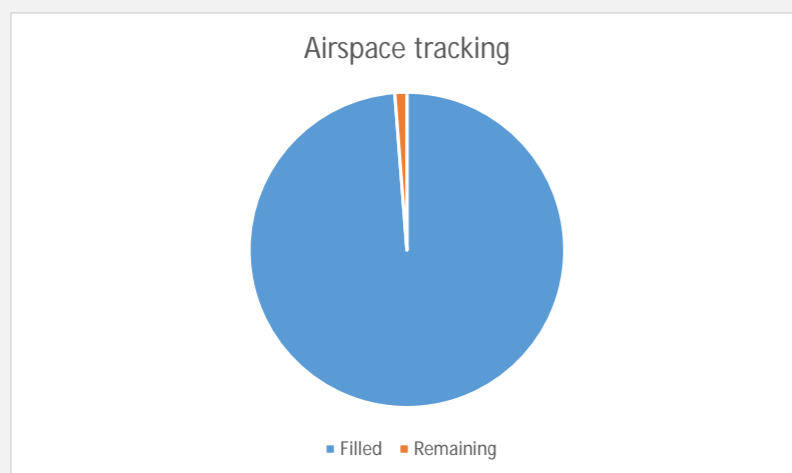

Material volumes remain low, due to the closure and the site approaching capacity

## Remaining airspace

Approximately 98% full (2% airspace remaining)

Estimated closure date based on current volumes: February 28 2022

## Monitoring effort during the quarter

Refer to individual sections for detailed information on any exceedances.

## Noise monitoring

### Overview

Independent noise expert was commissioned to undertake a noise assessment in December 2021. Went to site and no operations observed. No monitoring determined to be necessary as a result.

## Site works undertaken

A summary of the site works underway or recently completed is provided below.

Nature of works underway	CLG informed?	Completed?

## Site inspections

Inspections undertaken by site operator, HCC staff and / or HCC advisors (per 6.2 of the SMP) are summarised below.

Months	Nov	Dec	Jan
Inspections	4	4	4
Total in quarter	12		

ESCPs continue to function appropriately. No evidence of any sediment breakout has been observed, and all controls are functioning appropriately.

## Planting

Plants for the 2022 season have been sourced. Planting to take-place in the upcoming planting season.

## Dust monitoring

No dust complaints received, nor observed dust nuisance beyond the site boundary. Dust monitoring occurred and no asbestos was detected.

## Complaints received

Months	Nov	Dec	Jan
Complaints	0	0	0

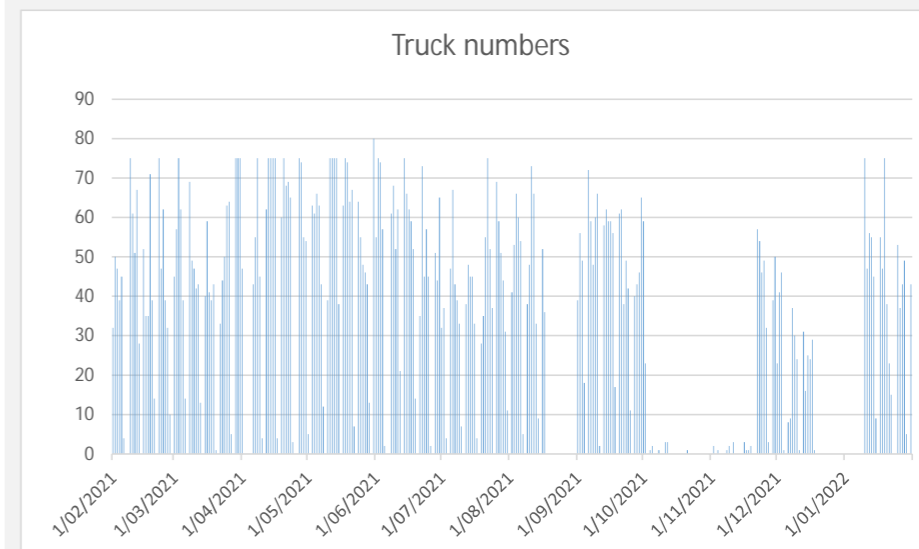

### Nature of complaints received

No complaints have been received this quarter.

Date received	Nature of complaint
