

**Initial Evaluation Procedure (IEP) Assessment - Completed for Hutt City Council**

**WARNING!!** This initial evaluation has been carried out solely as an initial seismic assessment of the building following the procedure set out in the "The Seismic Assessment of Existing Buildings" Technical Guidelines for Engineering Assessments, July 2017. This spreadsheet must be read in conjunction with the limitations set out in the accompanying report, and should not be relied on by any party for any other purpose. Detailed inspections and engineering calculations, or engineering judgements based on them, have not been undertaken, and these may lead to a different result or seismic grade.

Street Number & Name:	<b>38 Normandale Road</b>	Job No.:	<b>5-C3957.00</b>
AKA:		By:	<b>GSF</b>

City:	<b>Normandale, Hutt City</b>	Revision No.:	<b>0</b>

**Table IEP-1 Initial Evaluation Procedure Step 1**

**Step 1 - General Information**

**1.1 Photos (attach sufficient to describe building)**

**1.2 Sketches (plans etc, show items of interest)**

**1.3 List relevant features (Note: only 10 lines of text will print in this box. If further text required use Page 1a)**

Structure: Timber framed with lined walls and weatherboard cladding, wall linings replaced 1997  
 Foundations: Concrete piles and perimeter walls with timber subfloor (upgraded 1997 to the current code at that time)  
 Roof: Lightweight timber frames with lightweight cladding  
 Subsoil: B Rock- NZS1170.5:2004 Site Subsoil Classification of Lower Hutt  
 Construction Date: 1930 assumed substantially upgraded 1997

**3.7 Performance Achievement Ratio (PAR)**  
 (equals A x B x C x D x E x F)

**PAR**  
**Transverse** 1.75

**WARNING!!** This initial evaluation has been carried out solely as an initial seismic assessment of the building following the procedure set out in "The Seismic Assessment of Existing Buildings" Technical Guidelines for Engineering Assessments, July 2017. This spreadsheet must be read in conjunction with the limitations set out in the accompanying report, and should not be relied on by any party for any other purpose. Detailed inspections and engineering calculations, or engineering judgements based on them, have not been undertaken, and these may lead to a different result or seismic grade.

**Initial Evaluation Procedure (IEP) Assessment - Completed for Hutt City Council**

Street Number & Name:	38 Normandale Road	Job No.:	5-C3957.00
AKA:		By:	GSF
Name of building:	Minoh House	Date:	24/09/2019
City:	Normandale, Hutt City	Revision No.:	0

**Table IEP-4 Initial Evaluation Procedure Steps 4, 5, 6 and 7**

**Step 4 - Percentage of New Building Standard (%NBS)**

	Longitudinal	Transverse
4.1 Assessed Baseline %NBS (%NBS) <sub>b</sub> (from Table IEP - 1)	36%	36%
4.2 Performance Achievement Ratio (PAR) (from Table IEP - 2)	1.75	1.75
4.3 PAR x Baseline (%NBS) <sub>b</sub>	60%	60%
4.4 Percentage New Building Standard (%NBS) - Seismic Rating (Use lower of two values from Step 4.3)		60%

**Step 5 - Is %NBS < 34?**

NO

**Step 6 - Potentially Earthquake Risk (is %NBS < 67)?**

YES

**Step 7 - Provisional Grading for Seismic Risk based on IEP**

Seismic Grade **C**

**Additional Comments (items of note affecting IEP based seismic rating)**

Comment: Details of the two original chimney's is unknown, assumed original with a large mass sitting above the roof frame.  
The building is rated as **potentially earthquake prone due to prescence of two chimney's**, the greater timber structure is rated >34%.

**Relationship between Grade and %NBS:**

Grade:	A+	A	B	C	D	E
%NBS:	> 100	100 to 80	79 to 67	66 to 34	< 34 to 20	< 20

**WARNING!!** This initial evaluation has been carried out solely as an initial seismic assessment of the building following the procedure set out in "The Seismic Assessment of Existing Buildings" Technical Guidelines for Engineering Assessments, July 2017. This spreadsheet must be read in conjunction with the limitations set out in the accompanying report, and should not be relied on by any party for any other purpose. Detailed inspections and engineering calculations, or engineering judgements based on them, have not been undertaken, and these may lead to a different result or seismic grade.

**Initial Evaluation Procedure (IEP) Assessment - Completed for Hutt City Council**

AKA:		By:	GSF
Name of building:	Minoh House	Date:	24/09/2019
City:	Normandale, Hutt City	Revision No.:	0

**Table IEP-5 Initial Evaluation Procedure Step 8**

**Step 8 - Identification of potential Severe Structural Weaknesses (SSWs) that could result in significant risk to a significant number of occupants**

- 8.1 Number of storeys above ground level 2
- 8.2 Presence of heavy concrete floors and/or concrete roof? (Y/N) N

**Potential Severe Structural Weaknesses (SSWs):**

Note: Options that are greyed out are not applicable and need not be considered.

**Occupancy not considered to be significant - no further consideration required**

**Risk not considered to be significant - no further consideration required**

The following potential Severe Structural Weaknesses (SSWs) have been identified in the building that could result in significant risk to a significant number of occupants:

- 1. None identified
- 2. Weak or soft storey (except top storey)
- 3. Brittle columns and/or beam-column joints the deformations of which are not constrained by other structural elements
- 4. Flat slab buildings with lateral capacity reliant on low ductility slab-to-column connections
- 5. No identifiable connection between primary structure and diaphragms
- 6. Ledge and gap stairs

**IEP Assessment Confirmed by**

**WARNING!!** This initial evaluation has been carried out solely as an initial seismic assessment of the building following the procedure set out in "The Seismic Assessment of Existing Buildings" Technical Guidelines for Engineering Assessments, July 2017. This spreadsheet must be read in conjunction with the limitations set out in the accompanying report, and should not be relied on by any party for any other purpose. Detailed inspections and engineering calculations, or engineering judgements based on them, have not been undertaken, and these may lead to a different result or seismic grade.

<b>1. Building Information</b>	
Building Name/ Description	Minoh House
Street Address	38 Normandale Road, Normandale
Territorial Authority	Hutt City Council
No. of Storeys	1
Area of Typical Floor (approx.)	300 sqm
Year of Design (approx.)	Not confirmed assumed 1930
NZ Standards designed to	Foundations upgraded to - NZS 3604:1990
Structural System including Foundations	Timber framed structure with lined and I timber braced walls with weatherboard cladding. Timber framed roof with lightweight cladding , piled and concrete foundation wall.
Does the building comprise a shared structural form or shares structural elements with any other adjacent titles?	No
Key features of ground profile and identified geohazards	Generally flat ground profile under the house, general site located on sloped ground with increasing slope toward SH2 to the south east, subsoil B
Previous strengthening and/ or significant alteration	Upgraded foundation and replacement of wall linings 1997
Heritage Issues/ Status	Nil
Other Relevant Information	Original chimneys – no construction details

<b>2. Assessment Information</b>	
Consulting Practice	
CPEng Responsible, including: <ul style="list-style-type: none"> <li>• Name</li> <li>• CPEng number</li> <li>• A statement of suitable skills and experience in the seismic assessment of existing buildings<sup>1</sup></li> </ul>	
Documentation reviewed, including: <ul style="list-style-type: none"> <li>• date/ version of drawings/ calculations<sup>2</sup></li> <li>• previous seismic assessments</li> </ul>	Plans and notes dated 1997 detailing some internal wall changes and upgrade of the foundations
Geotechnical Report(s)	NA – subsoil assumed based on local knowledge refer to section 3
Date(s) Building Inspected and extent of inspection	24 September 2019
Description of any structural testing undertaken and results summary	None
Previous Assessment Reports	NA
Other Relevant Information	Nil

<sup>1</sup> This should include reference to the engineer's Practice Field being in Structural Engineering, and commentary on experience in seismic assessment and recent relevant training

<sup>2</sup> Or justification of assumptions if no drawings were able to be obtained

<b>3. Summary of Engineering Assessment Methodology and Key Parameters Used</b>	
Occupancy Type(s) and Importance Level	Importance Level 2
Site Subsoil Class	B assumed based on local knowledge and <i>NZS1170.5:2004 Site Subsoil Classification of Lower Hutt</i> <a href="http://nzsee.org.nz/db/2011/013.pdf">http://nzsee.org.nz/db/2011/013.pdf</a>
<b>For an ISA:</b>	
Summary of how Part B was applied, including: <ul style="list-style-type: none"> <li>• Key parameters such as <math>\mu</math>, <math>S_p</math> and F factors</li> <li>• Any supplementary specific calculations</li> </ul>	Ductility – 2.0 lined and braced timber framed walls Sp Factor – 0.5 for lightweight timber structure F Factor – 2.5 both directions (maximum) based on the arrangement and length of the bracing walls, sarked roof with lightweight cladding and re-piled foundations. 0.7 Factor applied for site characteristics, overall site has a significant slope toward SH2
<b>For a DSA:</b>	
Summary of how Part C was applied, including: <ul style="list-style-type: none"> <li>• the analysis methodology(s) used from C2</li> <li>• other sections of Part C applied</li> </ul>	NA
Other Relevant Information	NA

<b>4. Assessment Outcomes</b>		
Assessment Status (Draft or Final)	Final	
Assessed %NBS Rating	<34%NBS IL2 based on Chimney, the primary structure is rated 60%IL2	
Seismic Grade and Relative Risk (from Table A3.1)	D Grade 10 to 25 times risk comparable to new building	
<b>For an ISA:</b>		
Describe the Potential Critical Structural Weaknesses	Original chimneys – assumed brick	
Does the result reflect the building's expected behaviour, or is more information/ analysis required?	Yes – the ISA is sufficient, the primary timber structure is rated at 60%IL2	
If the results of this ISA are being used for earthquake prone decision purposes, <u>and</u> elements rating <34%NBS have been identified:	<b>Engineering Statement of Structural Weaknesses and Location</b>  NA	<b>Mode of Failure and Physical Consequence Statement(s)</b>  NA
<b>For a DSA:</b>		
Comment on the nature of Secondary Structural and Non-structural elements/ parts identified and assessed		
Describe the Governing Critical Structural Weakness		
If the results of this DSA are being used for earthquake prone decision purposes, <u>and</u> elements rating <34%NBS have been identified (including Parts) <sup>3</sup> :	<b>Engineering Statement of Structural Weaknesses and Location</b>	<b>Mode of Failure and Physical Consequence Statement(s)</b>
Recommendations (optional for EPB purposes)	Overall building rated 60%IL2 – recommend propping or removal of the chimney's	

<sup>3</sup> If a building comprises a shared structural form or shares structural elements with other adjacent titles, information about the extent to which the low scoring elements affect, or do not affect the structure.
