

Why have my rates increased?

Your rates help support critical Council services and infrastructure projects that make our city a place where everyone can thrive.

You told us what you wanted us to focus on:

Investment in our infrastructure while managing the financial impact.

Our Annual Plan 2022-23 does exactly that, and the rates revenue increase of 5.9% (before the impact of growth) will help us continue to make progress on getting the basics right.

Getting the basics right

For every \$100 you spend in rates, we plan to spend:

* Sustainability engagement represents spending on community activities along with facilitation of projects across council activities, including investment in:

- decarbonisation of council facilities
- cycleways
- RiverLink
- healthy urban waterways

We expect to receive \$5.88 of credit from the landfill. This will help to offset costs and is reflected in the figures for all these other services shown on this page.
