### 2 Overview and Purpose

- Hutt City Council is reviewing the City of Lower Hutt District Plan. This is a full review of the District Plan, including the approach to historic heritage.
- (2) This report is a record of the review with regard to historic heritage and includes an evaluation of objectives and provisions for a proposed District Plan to address historic heritage, in accordance with the requirements of s32 of the Resource Management Act 1991.
- (3) The concept of historic heritage, as expressed in section 2 of the Resource Management Act 1991 (RMA), is broad, and encompasses any natural or physical resource that contributes to an understanding of New Zealand's history and cultures<sup>1</sup>. This includes built heritage, archaeological sites, sites of significance to Māori, notable trees, and the surroundings associated with these resources. The proposed District Plan addresses historic heritage through three chapters, being:
  - HH Historical Heritage
  - SASM Sites and Areas of Significance to Māori
  - TREE Notable Trees
- (4) This report addresses the provisions of the Historical Heritage chapter, and relevant related provisions. This chapter and related provisions principally recognise and provide for the City's built heritage. Separate reports address the Sites and Areas of Significance to Māori and Notable Trees chapters.
  - This report sits as one of a package of reports for the proposed District Plan and should be read alongside the plan-wide report for matters common to all Plan topics.

(5)

<sup>&</sup>lt;sup>1</sup> Refer to the definition of *historic heritage* set out in section 2 of the RMA.

### 3 Statutory and Policy Context

(6) The following sections discuss the national, regional, and local policy framework that are particularly relevant to the statutory and policy context for historical heritage for the District Plan Review.

#### 3.1 Resource Management Act 1991

#### 3.1.1 Section 5 – Purpose and Principles

- (7) The purpose of the RMA is set out in Section 5. The purpose is to promote the sustainable management of natural and physical resources.
- (8) Under s5(2) of the Act, sustainable management means:

managing the use, development, and protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural well-being and for their health and safety while—

(a) sustaining the potential of natural and physical resources (excluding minerals) to meet the reasonably foreseeable needs of future generations; and

(b) safeguarding the life-supporting capacity of air, water, soil, and ecosystems; and

(c) avoiding, remedying, or mitigating any adverse effects of activities on the environment.

#### 3.1.2 Section 6 – Matters of National Importance

(9) Section 6 of the RMA sets out matters of national importance that all persons exercising functions and powers under the Act shall recognise and provide for in achieving the purpose of the RMA. The relevant s6 matters for historic heritage are:

Section	Relevant Matter	
s6(f)	the protection of historic heritage from inappropriate subdivision, use, and development	
	The proposed District Plan must recognise and provide for the protection of historic heritage. This is relevant to the purpose of the Historical Heritage chapter, and related historic	
	heritage provisions throughout the District Plan.	

#### 3.1.3 Section 7 – Other Matters

Section 7 of the RMA sets out other matters that all persons exercising
 functions and powers under it shall *have particular regard to* in achieving
 the purpose of the RMA. The relevant s7 matters for historical heritage are:

Section	Relevant Matter
s7(aa)	the ethic of stewardship
	This matter is relevant to the provisions related to historical
	heritage, because historic heritage values are maintained
	through the effective stewardship of places with historic
	heritage values by those responsible for managing them.
s7(b)	the efficient use and development of natural and physical
	resources
	This matter is relevant to the provisions related to historical
	heritage, because historic heritage values are promoted
	where the places with historic heritage values are maintained
	in sustainable long-term use.
s7(c)	the maintenance and enhancement of amenity values
	This matter is relevant to the provisions related to historical
	heritage, because places with historic heritage values can

Section	Relevant Matter		
	contribute to the amenity values associated with the urban		
	and rural environments within which they are located.		
s7(f)	maintenance and enhancement of the quality of the environment		
	This matter is relevant to the provisions related to historical		
	heritage, because places with historic heritage values		
	contribute to the quality of the urban and rural environments		
	within which they are located.		
s7(g)	any finite characteristics of natural and physical resources		
	This matter is relevant to the provisions related to historical		
	heritage, because places with historic heritage values are a		
	finite physical resource that, once lost, cannot be replaced.		
s7(i) the effects of climate change			
	This matter is relevant to the provisions related to historical		
	heritage, because historic heritage values associated with		
	places may be subject to risks from the effects of climate		
	change (including increased risks of flooding or inundation as		
	a result of rising sea levels, increased storm surges, or		
	increased frequency or severity of rainfall).		

#### 3.1.4 Section 8 – Treaty of Waitangi

- Section 8 of the RMA requires Council to *take into account* the principles of the Treaty of Waitangi when exercising functions and powers under the Act.
- (12) The relevant principles of the Treaty of Waitangi for historical heritage are:

Principle	Comment
Partnership	Consultation has been undertaken with Te Ātiawa and Ngāti Toa Rangatira as part of the District Plan review. This includes consultation on provisions related to historic heritage, and the potential for places to be included in the Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas. Refer to the Overview Section 32 Evaluation Report for a summary of consultation undertaken as part of the preparation of the proposed District Plan.
Rangatiratanga	Rangatiratanga refers to the right of tangata whenua <sup>2</sup> to manage their resources (including places with historic heritage value) in accordance with tikanga Māori.
	As part of preparing the provisions of the Historical Heritage chapter, consideration has been given to avoiding circumstances where the provisions may frustrate the ability for tangata whenua to manage customary resources in accordance with tikanga Māori. This has generally resulted in an approach where places with significance historic heritage values for tangata whenua are recognised and provided for through the provisions of the Sites and
	Areas of Significance to Māori chapter, rather than the Historical Heritage chapter.

<sup>&</sup>lt;sup>2</sup> All references to *tangata whenua* throughout this report are references to the term as defined in section 2 of the RMA. This defines the term *tangata whenua* as: "in relation to a particular area, means the iwi, or hapu, that holds mana whenua over that area".

#### 3.2 National Policy Statements

- (13) The following national policy statements are particularly relevant for historical heritage:
  - National Policy Statement on Urban Development 2020 (NPS-UD)
- (14) The relevant objectives and policies of this national policy statement are discussed below:

Reference	Comment
NPS-UD Objective 1	New Zealand has well-functioning urban environments that enable all people and communities to provide for their social, economic, and cultural wellbeing, and for their health and safety, now and into the future. Protecting significant historic heritage values from inappropriate subdivision, use, and development, while providing for places with significant historic heritage values to be maintained in sustainable long-term use, contributes towards achieving this objective within the urban environments of Lower Hutt.
NPS-UD Policy 4	Regional policy statements and district plans applying to tier 1 urban environments modify the relevant building height or density requirements under Policy 3 only to the extent necessary (as specified in subpart 6) to accommodate a qualifying matter in that area. There are places with significant historic heritage values in Lower Hutt's urban environments that are within areas that are subject to Policy 3 of the NPS-UD. The need to protect historic heritage from inappropriate subdivision, use, or development is a qualifying matter under clause 3.32(1)(a) of the NPS- UD.

#### 3.3 New Zealand Coastal Policy Statement

- (15) The New Zealand Coastal Policy Statement 2010 (NZCPS) sets out the objectives and policies in order to achieve the purpose of the RMA in relation to the coastal environment.
- (16) The relevant objectives and policies of the NZCPS are discussed below:

Reference	Comment
Objective 6	To enable people and communities to provide for their social, economic, and cultural wellbeing and their health and safety, through subdivision, use, and development, recognising that:
	<ul> <li>[]</li> <li>historic heritage in the coastal environment is extensive but not fully known, and vulnerable to loss or damage from inappropriate subdivision, use, and development.</li> <li>This objective is relevant to the provisions related to historical heritage, because there are places with significant historic heritage values that are located within Lower Hutt's coastal environment.</li> </ul>
Policy 1	Extent and characteristics of the coastal environment
	<ul> <li>[]</li> <li>(2) Recognise that the coastal environment includes:</li> <li>[]</li> <li>(g) items of cultural and historic heritage in the coastal marine area or on the coast;</li> <li>[]</li> </ul>

Reference	Comment
	This policy is relevant to the provisions related to historical heritage, which recognise that there are places with significant historic heritage values that are located on the coast and span the boundary between the terrestrial environment and the coastal marine area.
Policy 6	Activities in the coastal environment (1) In relation to the coastal environment: [] (j) where appropriate, buffer areas and sites of significant indigenous biological diversity, or historic
	heritage value. [] This policy is relevant to the provisions related to historical heritage, as it directs (where appropriate) the creation of buffers around areas and sites of significant
	historic heritage value. This is particularly relevant to areas within the coastal environment where there are a concentration of places with significant historic heritage values.
Policy 17	Historic heritage identification and protection Protect historic heritage in the coastal environment from inappropriate subdivision, use, and development by:
	(a) identification, assessment and recording of historic heritage, including archaeological sites;

Refere	ence	Comment
		(b) providing for the integrated management of such sites in collaboration with relevant councils, heritage agencies, iwi authorities and kaitiaki;
		(c) initiating assessment and management of historic heritage in the context of historic landscapes;
		(d) recognising that heritage to be protected may need conservation;
		(e) facilitating and integrating management of historic heritage that spans the line of mean high water springs;
		(f) including policies, rules and other methods relating to (a) to (e) above in regional policy statements, and plans;
		[]
		(i) considering provision for methods that would enhance owners' opportunities for conservation of listed heritage structures, such as relief grants or rates relief.
		This policy is relevant to the provisions related to historical heritage. Sub-policy (f) is particularly relevant to the preparation of the District Plan, as it directs the District Plan to include policies, rules, and other methods (such as mapping and scheduling) that
		relate to sub-policies (a) to (e). In addition to this, sub- policy (i) is also relevant to the Council's broader functions in relation to providing support for conservation outside of the District Plan to owners of places with significant historic heritage values.

#### 3.4 National environmental standards

(17) There are no national environmental standards that are relevant to historic heritage.

#### 3.5 National Planning Standards

- (18) Section 75(3)(ba) of the RMA requires district plans to give effect to national planning standards.
- (19) The first set of national planning standards was published in April 2019,
   with additional changes being incorporated into the standards since then.
- (20) Standard 4 (District Plan Structure Standard) of the National Planning Standards requires that, where relevant to the district, the District Plan include a "Historical Heritage" chapter under the "Historical and Cultural Values" heading, in Part 2 of the District Plan (District-wide Matters).
- (21) Standard 7 (District-wide Matters Standard) requires that the following matters, where relevant to the District Plan, are located in the Historical Heritage Chapter:
  - a. Identification of historic heritage.
  - b. Provisions to protect and manage historic heritage.
  - c. Heritage orders (there are no heritage orders in Lower Hutt City).
  - d. Schedules of identified historic heritage and heritage orders, although this may cross-reference and appendix.
- (22) The National Planning Standards also include a list of definitions, and directions for the visual representation of heritage items and overlays. A definition for 'historic heritage' is set by applying the same definition from the RMA.

# 3.6 Regional Policy Statement for the Wellington Region

(23) The Regional Policy Statement for the Wellington Region ('the RPS')identifies the significant resource management issues for the region and

outlines the policies and methods required to achieve the integrated sustainable management of the region's natural and physical resources.

(24) The relevant objectives and policies of the RPS for historical heritage are discussed below:

Reference	Comment
Objective 15	Historic heritage is identified and protected from inappropriate modification, use and development. This objective is directly relevant to the topic of historical heritage. The objective is similar to section 6(f) of the RMA, except that it also seeks that historic heritage is identified, in addition to being protected.
Policy 21 <sup>3</sup>	Identifying places, sites and areas with significant historic heritage values – district and regional plans District and regional plans shall identify places, sites and areas with significant historic heritage values that contribute to an understanding and appreciation of history and culture under one or more of the following criteria:
	<ul> <li>(a) historic values: these relate to the history of a place and how it demonstrates important historical themes, events, people or experiences.</li> <li>(b) physical values: these values relate to the physical evidence present.</li> <li>(c) social values: these values relate to the meanings that a place has for a particular community or communities.</li> </ul>

<sup>&</sup>lt;sup>3</sup> For conciseness, the policy quote has been abbreviated. Refer to Policy 21 on pages 102 to 103 of the RPS for the full text of the policy.

Reference	Commer	ht
	(d)	tangata whenua values: the place is sacred or important to Māori for spiritual, cultural or historical reasons.
	(e)	surroundings: the setting or context of the place contributes to an appreciation and understanding of its character, history
	(f)	and/or development. rarity: the place is unique or rare within the district or region.
	(g)	representativeness: the place is a good example of its type or era.
	sites, and	by directs the District Plan to identify places, d areas with significant historic heritage
		nd sets out the criteria that are relevant to the ation and evaluation of historic heritage values.
Policy 22	Protectin	ng historic heritage values – district and
	regional	plans
	District a	<b>plans</b> nd regional plans shall include policies, rules ther methods that:
	District a	nd regional plans shall include policies, rules ther methods that: protect the significant historic heritage values associated with places, sites and areas identified in accordance with policy 21, from inappropriate subdivision, use, and
	District a and/or o	nd regional plans shall include policies, rules ther methods that: protect the significant historic heritage values associated with places, sites and areas identified in accordance with policy 21,
	District a and/or o (a) (b) Sub-polic topic. Thi	nd regional plans shall include policies, rules ther methods that: protect the significant historic heritage values associated with places, sites and areas identified in accordance with policy 21, from inappropriate subdivision, use, and development; and avoid the destruction of unidentified archaeological sites and wāhi tapu with

Reference	Comment
	with identified places, sites, and areas from
	inappropriate subdivision, use, and development.
	Sub-policy (b) is principally addressed by the Sites and
	Areas of Significance to Māori chapter of the District
	Plan. With respect to unidentified archaeological sites,
	these are managed under the Heritage New Zealand
	Pouhere Taonga Act 2014, which requires that
	archaeological sites are not modified or destroyed
	without an archaeological authority.

#### 3.6.1 Proposed RPS Change 1

- (25) Section 74(2)(a)(i) of the RMA requires territorial authorities, when preparing and changing their district plan, to have regard to any proposed regional policy statement.
- (26) The decisions version of Proposed Change I to the RPS was published on 4 October 2024. No objectives or policies of Plan Change I to the RPS are particularly relevant to historic heritage.

#### 3.7 Operative regional plan

- (27) The Natural Resources Plan for the Wellington Region 2023 (NRP) is the operative regional plan.
- (28) The Regional Council is responsible for protecting historic heritage located within the coastal marine area. Some of the heritage items included in Schedule E of the Regional traverse the boundary between the coastal marine area (which is outside of the City Council's jurisdiction) and the Lower Hutt City Council's territory. Items in Schedule E5 are located entirely within the Council's territory. Attachment 4 includes a summary of the objectives and policies of the regional plan which are relevant to historic heritage, the sites in Schedule E which are located adjacent to or within Lower Hutt City, and how these have been considered by District Plan review.

#### 3.8 Proposed regional plan

(29) There are no provisions within Proposed Change 1 to the Natural Resources Plan that are relevant to historic heritage.

#### 3.9 Iwi management plans

- (30) Section 74(2A) of the RMA requires territorial authorities, when preparing or changing a district plan, to take into account any relevant planning document recognised by an iwi authority and lodged with the territorial authority, to the extent that its content has a bearing on the resource management issues of the district.
- (31) In addition, iwi authorities may have other planning documents that, while not mandatory considerations for the District Plan Review, should still be taken into account for the Review as they are a source of information on the intentions of an iwi authority. And considering these documents can aid integrated management.
- (32) There are no iwi management plans lodged with the Council that are relevant to the topic of historical heritage.
- (33) Matiu/Somes Island and Mokopuna Island were transferred to the Port Nicholson Block Settlement Trust (Taranaki Whānui) as part of the Port Nicholson Block (Taranaki Whānui ki Te Upoko o Te Ika) Claims Settlement Act 2009. The islands are jointly managed by Taranaki Whānui and the Department of Conservation by the Harbour Islands Kaitiaki Board. The Board has prepared the Wellington Harbour Islands Kaitiaki Plan<sup>4</sup> which sets out vision, values, and guiding principles for the management of the islands, along with management objectives. The Kaitiaki Plan includes details of the historic heritage values that are associated with the island, and planned activities to improve broader understanding of those values. Providing for Matiu/Somes Island and Mokopuna Island as part of the

<sup>&</sup>lt;sup>4</sup> Harbour Islands Kaitiaki Board. (2012). *Wellington Harbour Islands Kaitiaki Plan 2012-*2017. See: <u>https://www.doc.govt.nz/globalassets/documents/about-doc/policies-and-</u> <u>plans/conservation-management/wellington-harbour-islands-kaitiaki-plan.pdf</u>

Matiu/Somes Island Heritage Area is consistent with the vision and objectives set out under the Kaitiaki Plan.

# 3.10 Hutt City Council plans, policies, and strategies

- (34) In addition, there are other plans, policies and strategies of Council that, while not directly prepared under a specific Act, should be considered as part of the District Plan Review as they set Council's intentions on some matters that need to be addressed through the District Plan Review.
- (35) The following Council plans, policies and strategies are relevant for the historical heritage topic:
  - Long-term Plan 2024-2034
  - Taonga Tuku Iho Heritage Policy 2021
  - Built Heritage Incentive Fund
- (36) These plans, policies and strategies are discussed below:

Plan/Policy/Strategy	Comment
Long-term Plan 2024-	The Council's Long-term Plan is to describe the
20345	Council's activities, describe the community
	outcomes for the City, provide for integrated
	decision-making and coordination of the
	resources for the Council, provide for a long-
	term focus for decisions, and provide
	accountability to the community. The 2024-
	2034 Long-term Plan sets out three priorities for
	the next 10 years, including:
	1. Future-fit infrastructure.

<sup>5</sup> See:

https://hccpublicdocs.azurewebsites.net/api/download/134d69e298dc41d8848ecc9389 a7a5d6/\_LTP24-25/dbcfe269113df6647debf8350044af8d9fc

Plan/Policy/Strategy	Comment
	2. Enabling a liveable city and vibrant
	neighbourhoods.
	3. Supporting and enhancing the
	environment.
	The Long-term Plan includes the Council's
	Rates Remission Policy. Part 4 of the Rates
	Remission Policy includes rates remission on
	land protected for historic or cultural
	conservation purposes. This provides for a
	remission of up to 100% of the general rate
	where the rating unit includes a historic
	building, structure, or place identified in the
	District Plan or proposed District Plan, and the
	owner has voluntarily protected those features
	through a covenant or other legal mechanism.
Taonga Tuku Iho	The Taonga Tuku Iho Heritage Policy identifies
Heritage Policy 20216	that as the city evolves, protection and use of
	the city's historic heritage resources is
	fundamental to the sustainable management
	and enjoyment of the city's lived environment.
	The policy sets out a vision that Lower Hutt is a
	city where all communities value, promote,
	protect, celebrate, and conserve their stories
	and heritage. Council's role is to work with
7	communities to achieve this vision.
	The 5 key goals set out in the policy include:

<sup>6</sup> See:

https://hccpublicdocs.azurewebsites.net/api/download/dca10d32fed24fb48c89a051398 ef73e/\_CM9-WE/682e9bbc20576b84b7cb64108fb98c24ada

Plan/Policy/Strategy	Comment
	<ol> <li>Recognition and identification – heritage is identified and documented.</li> <li>Retention, protection, enhancement and conservation – heritage has a level of retention, protection, enhancement and conservation that is relative to its significance and importance.</li> <li>Celebration and promotion – heritage is valued and celebrated to ensure it is kept alive and remembered from one generation to the next.</li> <li>Sustainable economic use – economic growth that preserves and enhances the distinct character of communities, neighbourhoods, city and suburban centres is encouraged and supported.</li> <li>Council effectiveness – Council provides effective support for the implementation of the Council's goals and aspirations for the city's heritage.</li> <li>The proposed District Plan supports the implementation of each of these goals.</li> </ol>
Built Heritage Incentive Fund <sup>7</sup>	The Council's Built Heritage Incentive Fund helps owners preserve, restore, and protect the heritage values of their buildings or structures. The fund offers grants for up to half of the value of things such as: • Specialist advice

<sup>7</sup> See:

https://hccpublicdocs.azurewebsites.net/api/download/b9bb81497a3144a9af923b333cb b609d/ CM9-WE/ff7c238130952cb44fcb8a3a0ba2a474f1e

Plan/Policy/Strategy	Comment
	Conservation plans
	Building and resource
	consent fees
	Emergency building work
	Seismic strengthening work
	Conservation and restoration
	building work.
	The total value of the fund is \$1,500,000
	between 2021 and 2031.

# 3.11 District plans of adjacent territorial authorities

(37) The relevance of the plans of adjacent councils (and Kāpiti Coast) is discussed below:

Relevant Provisions
<ul> <li>The approach of the proposed Wellington District plan is to apply an objective, policy and rule framework that would:</li> <li>Manage the historic heritage of scheduled buildings and structures and within identified heritage areas.</li> <li>Enable repair and maintenance of buildings</li> <li>Enable removal of non-heritage buildings and structures</li> <li>Enable seismic investigations</li> <li>Provide for replacement windows for heritage buildings (including contributing buildings in heritage areas) as controlled activities</li> <li>Include stronger controls for other modifications of heritage or contributory buildings.</li> </ul>

Plan	Relevant Provisions
	<ul> <li>Require discretionary resource consent for total demolition of scheduled heritage buildings or structures. Includes policy direction that total demolition is avoided unless no alternatives. Public notification would be required.</li> </ul>
Upper Hutt City District Plan (operative 2004)	<ul> <li>The approach of the Upper Hutt City District Plan is to apply an objective, policy and rule framework which:</li> <li>Manages the historic heritage of scheduled significant heritage features</li> <li>Enables the repair and maintenance of heritage features</li> <li>Provides for additions and alterations as controlled activities.</li> <li>Partial or total demolition requires discretionary resource consent. Relevant policy direction includes to protected significant heritage value from unnecessary degradation, inappropriate modification or destruction.</li> </ul>
Proposed Porirua City District Plan (decisions version 2023)	<ul> <li>The approach of the proposed Porirua District Pan is to apply an objective, policy and rule framework that would:</li> <li>Manage the historic heritage of scheduled items and within scheduled sites, including within a defined heritage setting surrounding heritage items</li> <li>Enable repair, maintenance and decoration of items, and the maintenance and restoration of sites</li> </ul>

	Plan	Relevant Provisions
		<ul> <li>Enable repair, alterations and demolition of buildings within the heritage setting of heritage items</li> <li>Enable the restoration of heritage sites (permitted) and heritage items (controlled)</li> <li>Provide for earthquake strengthening of heritage items as a controlled activity</li> <li>Includes stronger controls for other modifications of heritage items and sites.</li> <li>Demolition of heritage items and sites have a discretionary or non-complying activity (subject to listing status). Includes policy direction that demolition and destruction is avoided unless identified exceptional circumstances apply.</li> </ul>
	Kapiti Coast District Plan (operative 2021)	<ul> <li>The approach of the Operative Kapiti Coast District Plan is to apply an objective, policy and rule framework which:</li> <li>Manages the historic heritage of scheduled historic buildings or structures, scheduled historic sites and scheduled historic areas, sites and within sites which contain heritage features.</li> <li>Enables the repair and maintenance of historic buildings, structures and sites.</li> <li>Provides for earthquake strengthening as a controlled activity.</li> <li>Includes stronger controls for other modifications.</li> <li>Partial or full demolition is discretionary or non- complying (subject to whether a Heritage NZ listing applies). Policy direction is to avoid demolition of Heritage NZ listed features.</li> </ul>

Plan	Relevant Provisions
Plan Proposed Wairarapa Combined District Plan (proposed 2023)	<ul> <li>Relevant Provisions</li> <li>The approach of the proposed Wairarapa Combined</li> <li>District Plan is to apply an objective, policy and rule</li> <li>framework that would: <ul> <li>Manage the historic heritage of buildings and items, and precincts.</li> <li>Enable maintenance and repair of heritage buildings or structures, or buildings in heritage precincts.</li> <li>Enable heritage upgrade works for heritage buildings or items</li> </ul> </li> </ul>
	<ul> <li>Enable interior alterations (except where building interiors are specifically listed)</li> <li>Includes stronger controls for other modifications.</li> <li>Require resource consent for demolition or removal as a discretionary activity. Policy direction is to discourage demolition of heritage buildings or items, and avoid adverse effects on historic heritage values as much as practicable.</li> </ul>

### 3.12 New Zealand Heritage List / Rārangi Kōrero

- (38) Section 74(2)(b)(iia) of the RMA requires that the Council have regard to relevant entries on the New Zealand Heritage List/Rārangi Kōrero when preparing the District Plan. There are 56 entries on the New Zealand Heritage List that are located within the Council's territorial boundary, and these are set out in Attachment 6.
- (39) All but two of the entries on the New Zealand Heritage List are included in the proposed District Plan Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas. The entries that have not been included are the Pencarrow Lighthouse (entry number 34) and the Old Belmont to

Pauatahanui Road (entry number 7711). The reasons for not including these entries in in the District Plan schedules are as follows:

Entry	Reasons for not including the entry in the schedules
Pencarrow Lighthouse (entry number 34)	The Lower Pencarrow Lighthouse is located in the East Harbour Regional Park, which is managed by the Greater Wellington Regional Council (see discussion on the management of cultural heritage as part of the Toitū Te Whenua Parks Network Plan 2020-2030 in section 3.13 below). It is therefore considered that there is a low risk of inappropriate subdivision, use, or development of the lighthouse, and that protection of the lighthouse in the District Plan is not justified.
Old Belmont to	The road is principally located within the Belmont
Pauatahanui Road	Regional Park, which is managed by the Greater
(entry number	Wellington Regional Council (see discussion on the
7711)	management of cultural heritage as part of the
	Toitū Te Whenua Parks Network Plan 2020-2030 in
	section 3.13 below). The southern portion of the
	road, which is not located within the regional park,
	is located within road reserve. It is therefore
	considered that there is a low risk of inappropriate
	subdivision, use, or development of the road, and
	that protection of the road in the District Plan is not justified.

# 3.13 Other statutory and non-statutory plan, policies, strategies, and guides

In addition to Hutt City Council's plans, policies and strategies (discussed above), there are regional and national plans, policies, strategies, and guides that, while not mandatory considerations for the District Plan

Review, should still be considered as they form part of the management regime for natural and physical resources in the district, and considering these documents can aid integrated management.

- (41) The following other statutory and non-statutory plans, policies, strategies, or guides are relevant for historical heritage:
  - Guide to the Management of Historic Heritage: District Plans (Heritage New Zealand Pouhere Taonga, April 2022)
  - ICOMOS New Zealand Charter for the Conservation of Places of Cultural Heritage Value 2010 (ICOMOS New Zealand, 2010)
  - Toitū Te Whenua Parks Network Plan 2020-2030 (Greater Wellington Regional Council).
- (42) These documents are discussed below:

#### 3.14 Other legislation or regulations

- (43) In addition to the RMA, other legislation and regulations can be relevant considerations for a district plan, particularly where management of an issue is addressed through multiple pieces of legislation and regulatory bodies.
- (44) The following other legislation and regulations are relevant for historical heritage:
  - Heritage New Zealand Pouhere Taonga Act 2014
  - Building Act 2004

Act or Regulation	Comments
Heritage New	The purpose of the HNZPTA is to promote the
Zealand Pouhere	identification, protection, preservation, and
Taonga Act 2014	conservation of the historical and cultural
(HNZPTA)	heritage of New Zealand. Section 42 of the
	HNZPTA requires that archaeological sites <sup>13</sup> must

<sup>&</sup>lt;sup>13</sup> Under section 6 of the HNZPTA, archaeological site means: "subject to section 42(3),-

Act or Regulation	Comments
	not be modified or destroyed without an
	archaeological authority granted by Heritage
	New Zealand Pouhere Taonga. Section 74 of the
	HNZPTA provides that Heritage New Zealand
	Pouhere Taonga may make recommendations
	to local authorities about historic areas that are
	included in the New Zealand Heritage List, and
	that local authorities must have particular
	regard to these recommendations.
Building Act 2004	The Building Act provides for the establishment
	and maintenance of the New Zealand Building
	Code, which sets out the performance
	requirements for new buildings and alterations
	to existing buildings. Requirements in the
	Building Act which relate to earthquake
	strengthening, protection from fire risk and
	access for persons for disabilities can be
	relevant to the maintenance, repair and
	alterations of buildings with historic heritage
	features.

(b) includes a site for which a declaration is made under section  $43(1)^{"}$ 

<sup>(</sup>a) any place in New Zealand, including any building or structure (or part of a building or structure), that—

<sup>(</sup>i) was associated with human activity that occurred before 1900 or is the site of

the wreck of any vessel where the wreck occurred before 1900; and

<sup>(</sup>ii) provides or may provide, through investigation by archaeological methods, evidence relating to the history of New Zealand; and

## 4 Resource management issues

# 4.1 Introduction to resource management issues

- (45) This section discusses the resource management issues for infrastructure, and includes a summary of the evidence base that has informed the identification of resource management issues.
- (46) The determination of resource management issues for Infrastructure, and the options for addressing those issues, has involved:
  - A review of the statutory and strategic context (outlined in detail Section 3 of this report),
  - A review of the existing approach of the District Plan,
  - A review of the approaches of other district plans,
  - Engagement with Mana Whenua, the community and other stakeholders (including infrastructure providers), and
  - Other relevant technical advice.
- (47) Historic heritage provides a connection to the past and an understanding and appreciation of history and culture. Historic heritage can include buildings, structures, sites, or areas that evoke or are associated with historical or cultural significance.
- (48) Higher order planning documents emphasise the importance of historic heritage as a resource management issue. The protection of significant historic heritage against inappropriate subdivision, use and development is a matter of national importance under section 6(f) of the Resource Management Act, and Policies 21 and 22 of the Regional Policy Statement require that the District Plan identify and protect places and areas with significant historic heritage values.
- (49) Along with protecting significant historic heritage, there is also a need to provide for continued use, appropriate adaptive re-use, and health and

safety alterations (including alterations to improve energy efficiency, internal environmental quality, earthquake strengthening, fire safety and accessibility) to ensure ongoing social and cultural value, economic viability, continued usability, and the safety of people.

#### 4.2 Evidence base

#### 4.2.1 Existing approach of City of Lower Hutt District Plan

(50) Section 1.10.10 of the operative District Plan sets out a strategic objective for heritage, being:

To retain the heritage values of buildings and structures while ensuring that the rights of property owners to use identified heritage buildings and structures in an economically viable way are not compromised.

- (51) Chapter 14F of the operative District Plan sets out the objectives, policies, and rules for the use and development of heritage buildings and structures listed in the appendices to the chapter. There are two objectives:
  - To ensure that the heritage values of identified heritage buildings and structures are not unnecessarily lost through demolition or relocation, or compromised by any additional work;
    - Supporting policies seek to protect the exterior of buildings from works which adversely affect heritage values, and to ensure a thorough assessment of alternative is undertaken when demolition is proposed.
  - To allow a wider range of activities to assist in the retention of heritage buildings;
    - The supporting policy is to allow a wider range of activities within heritage buildings providing the character and amenity of surrounding properties are not adversely affected.
- (52) Rule 14F 2.1 provides alteration, repair and modification of heritagebuildings as permitted activities where it involves either:

- Redecoration, repair or alterations which are internal and not visible from the road, or
- Minor repair, alteration or maintenance to the exterior of the building which does not require building consent.
- (53) With respect to the above, the terms alteration, repair, modification, redecoration, and minor repair, alteration or maintenance are not defined. All other alteration, repair or modification requires resource consent as a restricted discretionary activity (Rule 14F 2.2).
- (54) Under Rule 14F 2.2 discretionary resource consent is required for:
  - Activities within heritage buildings or structures which are not within the provisions of the Petone Commercial Activity Area, or the Heretaunga and Riddlers Crescent Heritage Precincts of the High Density Residential Activity Area; or
  - Demolition or relocation of any heritage building or structure.
- (55) There are also two heritage precincts located in the High Density Residential Activity Area (chapter 4G of the operative District Plan), being the Heretaunga Settlement Heritage Precinct and the Riddlers Crescent Heritage Precinct. The rules for these precincts enable accessory buildings as potentially permitted activities, where compliant for controls for height and placement. New buildings or modification of existing buildings are restricted discretionary activities subject to controls on the size and placement of buildings, or are otherwise discretionary activities.
- In addition to these rules, subdivision of land containing a heritage building or structure in Appendix 1 or 2 of chapter 14F, or in the Heretaunga Settlement Heritage Precinct and the Riddlers Crescent Heritage Precinct, is a discretionary activity (under rule 11.2.4).

(57) Issues identified with the provisions in the operative District Plan include:

- Policies for heritage buildings and structures do not provide clear guidance or direction on the appropriateness of additions and alterations. There is also not clear policy direction on circumstances where it may be appropriate to allow relocation or total demolition.
- While there is acknowledgement of the need to facilitate changes in use for heritage buildings, this is not supported by policies that seek

to enable other necessary building upgrade requirements required under the Building Act (including seismic strengthening, fire protection, and access for people with disabilities).

- There is little recognition or support for resilience to natural hazards (including earthquakes) within the operative provisions.
- Important terms such as maintenance and repair are not defined, so that their meaning and scope are uncertain to plan users.
- The distinction between heritage areas and heritage precincts is uncertain, and it is unclear why both planning tools are necessary to achieve a similar outcome.
- Schedules do not include information about heritage values, and do not include unique identifiers for each heritage building, structure, or area.

#### 4.2.2 Analysis of other District Plans

(58) Refer to section 3.11 of this report for analysis of the district plan provisions for historical heritage that are contained in the district plans of the territorial authorities of the Wellington region.

#### 4.2.3 Advice from mana whenua

- (59) The Council has engaged with its mana whenua partners throughout the process of preparing the proposed District Plan, including the preparation of the Historical Heritage chapter. This includes:
  - Specific engagement with the Council's Kāhui Mana Whenua group on the development of the draft Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas.
  - Seeking feedback from mana whenua on the draft District Plan.
- (60) The Council received no specific advice or feedback from mana whenua on the draft District Plan provisions for historical heritage.

#### 4.2.4 Stakeholder and community engagement

(61) The Council has engaged with stakeholders and the community over several years on the topic of historical heritage, and this feedback has informed the development of the historical heritage provisions in the proposed District Plan, along with the proposed Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas.

#### **Timeline of engagement**

- (62) Engagement with stakeholders and the community has included:
  - **Early 2021:** seeking feedback on potential heritage listings from stakeholders.
  - April 2021: engagement with potentially affected property owners on the early development of the draft heritage assessment.
  - September 2021: further engagement with potentially affected property owners on the development of the draft heritage assessment.
  - **March 2022:** engagement with potentially affected property owners, noting that the review of the Historical Heritage chapter is being delayed by the requirement (introduced by the government at the end of 2021) for the Council to undertake Plan Change 56 (the Council's intensification plan change).
  - August 2022 to June 2023: Plan Change 56 is notified, which includes notification of the operative District Plan Schedule of Heritage Buildings and Structures, Heritage Areas, and Heritage Precincts as 'qualifying matters'. PC56 also included proposed 'Residential Heritage Precincts', which were eventually rejected by the Independent Hearings Panel. Statutory engagement with the community on PC56 occurred in late 2022, with hearings being conducted in April 2023.
  - November to December 2023: Council consulted on a draft version of the District Plan. Every property owner of a property that was included in the draft Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas was sent a letter notifying them that their property was being considered for inclusion in the schedules.
  - **Early 2024:** several submitters, including individual property owners, provided feedback to the Council on the Historical Heritage Chapter, including the draft schedules. The Council considered these submissions and sought further information from some submitters.

#### Feedback on the Draft District Plan

- (63) The Council received a broad range of general feedback from the public on the draft District Plan relevant to the topic of historical heritage.
   Feedback included the following issues:
  - Impacts on property owners of heritage listing; including costs of maintaining heritage values, restrictions on altering buildings and increased insurance costs.
  - Specific feedback on additional heritage listings or removal of existing listings.
  - Whether building interiors should be protected.
  - Whether the physical condition of buildings should be considered for new listings, and whether demolition should be enabled for buildings which are dangerous or insanitary.
  - Council should work with local iwi to protect Māori heritage, not just European heritage.
  - Questioning the heritage value of buildings which cannot be seen from the public street.

## 4.2.5 Technical information/advice commissioned

- (64) The development of the Historical Heritage chapter, and in particular the development of the Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas, has been informed by technical advice from heritage experts commissioned by the Council.
- (65) The technical information and advice commissioned by the Council is summarised below.

## Draft Heritage Inventory Reports (June 2021 – November 2023)

(66) The Council commissioned heritage consultants WSP and Ian Bowman to prepare a draft heritage inventory report between 2021 and 2023. The purpose of the report was to undertake a district-wide technical review and assessment of heritage places, sites, and areas in Lower Hutt. The report provided the basis for the draft Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas. These draft Schedules were consulted on with the community and property owners as part of consultation on the draft District Plan from November to December 2023.

- (67) With respect to the draft inventory reports for buildings and structures (together referred to as the draft inventory of HNZPT listed items and the draft inventory of non-HNZPT listed items), the draft inventory reports recommended that:
  - 125 new items be added to the inventory.
  - 21 existing items be removed from the operative District Plan heritage inventory.
- (68) With respect to the draft inventory report for heritage areas, the report recommends that 12 areas are added to the schedule of heritage areas. However, several of these areas were not supported by the Independent Hearings Panel as part of Plan Change 56. On this basis, only 6 of these areas were included in the draft Schedule of Heritage Areas as part of the draft District Plan.

### Review of Draft Heritage Inventory Reports and preparation of Proposed Heritage Inventory Reports

- (69) As part of the feedback received by the Council from the community and property owners on the draft District Plan, the Council received feedback that questioned the methodology and level of information used to evaluate the significance of places of identified in the schedules. Several property owners also challenged the individual inventory reports for their properties.
- (70) Following consultation with the community and property owners on the draft District Plan, the Council commissioned heritage experts Michael Kelly and Russell Murray to undertake a review of the draft heritage inventory reports. The review found that overall, the methodology used to identify and evaluate the significance of places with historic heritage values is sound, although the level of information used to support adding new items to the District Plan would benefit from being increased, to ensure that those additions are sufficiently robust. It was also considered that the significance thresholds used in the inventory reports could be simplified.
- (71) The review also identified that the level of information contained in the draft reports for heritage areas was generally found to be sufficient.

- (72) As a result of this review, the Council considered that:
  - The reports prepared by WSP and Ian Bowman provided a sufficient basis to maintain the status quo in relation to retaining buildings within the operative heritage schedules as part of the proposed Schedule of Heritage Buildings and Structures;
  - The reports prepared by WSP and Ian Bowman provided a sufficient basis for including heritage areas within the proposed Schedule of Heritage Areas;
  - Reports for buildings and structures proposed to be added to the Schedule of Heritage Buildings and Structures (that are not already in the District Plan) would be updated to incorporate additional information about their significance.
- (73) Michael Kelly and Russell Murray prepared updated inventory reports for buildings and structures proposed to be added to the Schedule of Heritage Buildings and Structures. These are contained in Attachment 10. The reports prepared by Michael Kelly and Russell Murray are numbered from H087 onwards (with the remainder of the reports from H001 to H086, which relate to operative District Plan heritage buildings proposed to be rolled over into the proposed District Plan, being prepared by WSP and Ian Bowman).
- A methodology report prepared by Michael Kelly and Russell Murray describing how the updated reports were prepared is included in Attachment 9.

# Council's approach to the proposed Schedules of Heritage Buildings, Structures, and Areas, based on the technical information commissioned to date

- (75) Based on the technical information commissioned to date (outlined above), the Council's approach to developing the proposed Schedule of Heritage Buildings and Structures, and proposed Schedule of Heritage Areas, is as follows:
  - Existing heritage buildings and structures in operative District Plan:
    - The inclusion or omission of such buildings and structures from the proposed Schedule has been informed by the draft Heritage

Inventory Review Report (by WSP). It is considered these reports provide sufficient information to justify the continued inclusion or removal of existing buildings or structures from the schedule in any such case.

- Buildings and structures proposed to be added to the Schedule of Heritage Buildings and Structures:
  - Buildings and structures that were proposed to be added to the draft District Plan Schedule of Heritage Buildings and Structures, and which were evaluated as having a more than moderate overall significance in the draft Heritage Inventory Review (by WSP), have been reviewed in detail by Michael Kelly and Russell Murray. Where the review confirmed that a place has significant historic heritage values, the place has been included in the proposed Schedule of Heritage Buildings and Structures.
  - Except that that any buildings and structures which are located in regional parks managed by the Greater Wellington Regional Council, were not included because those buildings and structures are already protected by the reserve management plan associated with the park.

#### • Heritage areas:

- Heritage areas that were proposed to be added to the draft District Plan Schedule of Heritage Areas have been included in the proposed Schedule of Heritage Areas based on the information contained in the draft Heritage Inventory Review reports (by WSP). It was considered that these reports provide sufficient information to justify retaining (in the case of the Jackson Street Heritage Area, Heretaunga Settlement Heritage Area, Lower Hutt Civic Precinct Heritage Area, and Riddlers Crescent Heritage Area) or adding (in the case of the Matiu/Somes Island and Ōrua-pouanui/Baring Head Heritage Area) those areas to the District Plan.
- Heritage areas identified in the draft Heritage Inventory Review (by WSP), but which were not included in the draft District Plan Schedule of Heritage Areas, have not been included in the proposed Schedule of Heritage Areas. In light of the findings of

the Independent Hearings Panel on PC56, it was considered that there was not sufficient evidence of significant historic heritage values associated with these places to include them within the Schedule at this time.

- The Petone Recreation Grounds, which was provided for as part of the draft Schedule of Heritage Buildings and Structures.
   However, as a result of the review by Michael Kelly and Russell Murray, it was considered that this place would be more appropriately provided for as a heritage area (see HA-07).
- (76) This approach leads to the proposed District Plan recognising and providing for a greater quantity and diversity of places with significant historic heritage values, when compared to the operative District Plan, as summarised in the following table:

	Operative District Plan	Draft District Plan	Proposed District Plan
Heritage Buildings and Structures	109	218	168
Heritage Areas	4	6	7

(77)

Notwithstanding the places that are included in the proposed Schedules of Heritage Buildings, Structures, and Areas in the proposed District Plan, these Schedules do not represent a 'complete' list of all places with significant historic heritage values in the district. With further information, evaluation, and evidence, it may be possible to identify additional places that could be added to the schedule, and this could be undertaken in response to submissions on the proposed District Plan, and/or as part of future District Plan reviews. However, for the time being, the places included in the proposed Schedules of Heritage Buildings, Structures, and Areas are considered to provide appropriate recognition of the significant historic heritage values of the district, while providing for improved protection of places with significant historic heritage values when compared to the operative District Plan.

#### Heritage Inventory reports

The Heritage Inventory reports, which form the evidence base for the
 Schedule of Heritage Buildings and Structures and Schedule of Heritage
 Areas are contained in Attachment 10 and Attachment 11 to this report.

### 4.2.6 Heritage buildings and insurance

(79) Concern with the ability for buildings identified in the District Plan as heritage building to obtain insurance was raised by some submitters on the draft District Plan. In response to this, the several common home insurance policies have been reviewed to identify the extent to which they provide for heritage buildings. This is summarised in the following table.

Insurance policy	Provision for heritage buildings
AA Insurance – Home Insurance Policy <sup>14</sup>	<ul> <li>Will not pay for additional costs or fees to comply with any heritage covenants or heritage orders<sup>15</sup>.</li> <li>Will only replicate heritage features if the currently equivalent techniques and/or building materials are readily available in New Zealand.</li> </ul>
Tower Insurance – House Insurance Standard Cover <sup>16</sup>	<ul> <li>No exclusions or conditions for heritage buildings.</li> </ul>
State Insurance – Home	• Additional cover for heritage homes can be added to the policy at an additional cost.

<sup>&</sup>lt;sup>14</sup> See: <u>https://www.aainsurance.co.nz/manage-policy/policy-documents/home-insurance-policy-document</u>

<sup>&</sup>lt;sup>15</sup> Heritage covenants (under the Heritage New Zealand Pouhere Taonga Act 2014) and heritage orders (under Part 8 of the Resource Management Act) are separate mechanisms to including a building in the District Plan Schedule of Heritage Buildings and Structures. The proposed District Plan does not include any heritage orders or heritage covenants (although there may be buildings within the district that have heritage covenants registered with Heritage New Zealand Pouhere Taonga).
<sup>16</sup> See: <u>https://www.tower.co.nz/wp-content/uploads/2021/03/house-standard-09-24.pdf</u>

Insurance policy	Provision for heritage buildings
Comprehensive Policy <sup>17</sup>	<ul> <li>Covers reasonable costs and fees to comply with a heritage covenant or order.</li> <li>Will only pay to replicate heritage features if the techniques are still commonly used and the building materials are readily available in New Zealand.</li> </ul>
Vero Insurance – Residential Home Policy <sup>18</sup>	<ul> <li>The additional costs of complying with a heritage covenant registered with Heritage New Zealand is not covered.</li> <li>Replacement condition only includes replicating heritage features if it's possible with the techniques or building materials (or both) that are currently equivalent and readily available in New Zealand.</li> </ul>
AMI – Home Plus Insurance <sup>19</sup>	<ul> <li>Additional cover for heritage homes can be added to the policy at an additional cost.</li> <li>Covers reasonable costs and fees to comply with a heritage covenant or order.</li> <li>Will only pay to replicate heritage features if the techniques are still commonly used and the building materials are readily available in New Zealand.</li> </ul>

nz/state/nz/en/documents/home-contents/state-home-contents-home-

<sup>&</sup>lt;sup>17</sup> See: <u>https://www.state.co.nz/content/dam/insurance-brands-</u>

comprehensive-contents-comprehensive-policy-wording-si6995-1-0324.pdf

<sup>&</sup>lt;sup>18</sup> See: <u>https://www.vero.co.nz/documents/personal-insurance/vero-residential-home-policy-0724.pdf</u>

<sup>&</sup>lt;sup>19</sup> See: <u>https://www.ami.co.nz/content/dam/insurance-brands-</u>

nz/ami/nz/en/documents/home-contents/ami-home-plus-contents-plus-insurancepolicy-wording-AMI1713-1-0824.pdf

(80) Based on a range of common insurance policies, the extent to which cover is available for heritage buildings, the exclusions that may apply, and the additional costs associated with cover for heritage buildings may vary depending on the policy. Notwithstanding this, it is clear that insurance policies are available for heritage buildings in New Zealand.

### 4.2.7 Legal advice

(81) To inform the development of the provisions for historical heritage, the Council commissioned legal advice about the Council's obligations to recognise and protect buildings and structures with historic heritage value in the District Plan. This legal advice is set out in Attachment 12.

# 4.3 Summary of issues analysis

(82) The following table provides a summary of the analysis of resource management issues set out in this section of the report:

Resource management issue	Summary
Issue 1: recognising and protecting historic heritage	<ul> <li>Recognising and protecting historic heritage is a matter of national importance under section 6(f) of the RMA. Identifying and protecting significant historic heritage is a requirement of policies 21 and 22 of the Regional Policy Statement.</li> <li>The City of Lower Hutt and its environs have a long and layered history of occupation, use and development, and because of this there are many places and area with significant historic heritage values.</li> <li>The operative District Plan provisions for historic heritage regulate alterations and modifications to schedule heritage buildings, structures, and areas, but only provide high- level policy guidance to support decision- making.</li> </ul>

Resource	Summary
management issue	
	<ul> <li>All other district plans in the region include objectives, policies, and rules for the protection of significant heritage values. Newer district plans, including the Wellington City District Plan and the Porirua District Plan, include more specific policy direction and rules to guide decision-making on the range of different types of activities associated with historic heritage (including maintenance and repair, alterations, additions, relocation, and demolition).</li> <li>Feedback from the community on the draft District Plan identified that the community values the contribution of historic heritage to the identity of the city, contribution to sense of place, and connections to past generations. However, information used to justify the scheduling of places for their historic heritage values must be based on a sound methodology and robust information and evaluation.</li> <li>Technical information and advice commissioned by the Council justifies recognising 161 buildings and structures, and Areas. This provides for improved recognition of historic heritage values across the City when compared to the operative District Plan, which recognises 109 buildings and structures, and 4 areas.</li> <li>The key risk to historic heritage includes the damage, modification, or destruction of</li> </ul>

Resource	Summary
management issue	
Issue 2: providing	<ul> <li>historic heritage values from inappropriate building works, earthworks, subdivision, land development, and demolition. These risks are particularly relevant in areas such as residential, centres, commercial and industrial zones subject to development pressure.</li> <li>Providing for the sustainable long-term use of</li> </ul>
for the sustainable long-term use of historic heritage	<ul> <li>places with significant historic heritage values supports the protection of those values. On the other hand, places with significant historic heritage values that are unused risk falling into disrepair, which in turn risks the loss of those values.</li> <li>The continuing use of places with significant historic heritage values provides a range of ongoing benefits to the community, including: <ul> <li>Providing recognisable focal points for social, cultural, and economic activity (the Jackson Street Heritage Area is a good example of this).</li> <li>Providing for the efficient use of a finite physical resource.</li> <li>Providing on-going community connection to the past.</li> </ul> </li> <li>In many instances, providing for continued use of heritage buildings must be considered alongside the requirements of the Building Act 2004, which includes requirements to provide for seismic strengthening where buildings are assessed as being earthquake-prone, and requirements to provide for fire</li> </ul>

Resource	Summary
management issue	
	protection and accessibility upgrades where
	buildings are altered or undergo a change in
	use.
	While the operative District Plan provisions
	provide a degree of recognition of the value
	of maintaining buildings in use, they do not
	recognise the necessity of undertaking
	upgrades to comply with the Building Act.
	• Newer District Plans in the Wellington region,
	in particular the Wellington City District Plan,
	recognise sustainable long-term use of
	places with heritage values as an objective,
	and include provisions that recognise the
	necessity of undertaking upgrades to
	buildings to meet the requirements of the
	Building Act.
	Feedback from the community on the draft
	District Plan identified that enabling the on-
	going use of places with heritage values
	(including by recognising the need to
	undertake necessary upgrades to buildings)
	is an important issue.

# 5 Scale and significance assessment

- (83) In writing this evaluation report the Council must provide a level of detail that corresponds to the scale and significance of the environmental, economic, social, and cultural effects anticipated from the implementation of the proposal.
- (84) In assessing that scale and significance we have had regard to the following matters:

Matter	Analysis
Matters of national importance (section 6 of the RMA)	<b>High.</b> The provisions address the protection of historic heritage from inappropriate subdivision, use and development, which is a matter of national importance under section 6(f) of the RMA. Refer section 3.1.2 of this report.
Other matters (section 7 of the RMA)	<ul> <li>High. The provisions address the following matters under section 7 of the RMA (refer section 3.1.3 of this report):</li> <li>The ethic of stewardship (section 7(aa)).</li> <li>The efficient use and development of natural and physical resources (section 7(b)).</li> <li>The maintenance and enhancement of amenity values (section 7(c)).</li> <li>The maintenance and enhancement of the quality of the environment (section 7(f)).</li> <li>The finite characteristics of natural and physical resources (section 7(g)).</li> <li>The effects of climate change (section 7(i)).</li> </ul>

Matter	Analysis
Degree of change from the operative plan	<b>Moderate.</b> The overall combination of regulatory and non-regulatory approaches proposed is similar to the approach taken by the operative District Plan. However, the proposed provisions provide greater detail about a range of different activities in relation to historic heritage. This includes a range of new policies that guide decision-making on the appropriateness of different kinds of development, and a range of new rules that provide greater clarity on the types of activities that are permitted, and the types of activity that require resource consent.
Geographic scale of effects	<ul> <li>Low. The geographical scale of the effects are limited and confined to:</li> <li>168 proposed heritage buildings and structures, including their sites.</li> <li>7 proposed heritage areas.</li> </ul>
Number of people affected	<b>Low.</b> Due to the limited geographical application of the proposed provisions, the number of people potentially affected is also limited.
Duration of effects	<b>High.</b> The effects of the proposed provisions are ongoing. Because rules that protect historic heritage have immediate legal effect (under section 86B of the RMA) the effects of the provisions will commence on the date that the proposed District Plan is publicly notified.
Economic impacts	<b>Moderate.</b> The likely economic impacts of the provisions are anticipated to be modest, based on the limited geographic application of the

Matter	Analysis
	<ul> <li>provisions. Notwithstanding this, the provisions</li> <li>may lead to economic impacts on those who</li> <li>are subject to them, including:</li> <li>Potentially increased insurance excess</li> </ul>
	<ul> <li>Fotentially increased insurance excess costs for owners of heritage buildings and structures;</li> <li>Costs associated with applying for resource consents in circumstances where the rules for historical heritage apply (although these costs are partly offset by waivers of up to 50% of application fees for protection-related work)</li> <li>Increased construction costs associated with heritage-related building work (including material and labour costs)</li> <li>Insurance related costs (depending on the policy, potentially increased premiums, or exclusions for heritage related work)</li> <li>Opportunity costs associated with foregone development capacity as a result of the provisions.</li> <li>Costs to the Council of providing rates rebates, resource and building consent fee waivers, and grants from the Built Heritage</li> </ul>
	Incentive Fund. Other economic impacts include:
	<ul> <li>Attraction of businesses and customers to vibrant commercial heritage areas, such as the Jackson Street Heritage Area.</li> <li>Attraction of tourists and visitors to places and areas with significant historic heritage value.</li> </ul>

Matter	Analysis
	The development of technical and construction skills to undertake heritage conservation provides skills and employment that benefit the wider construction sector.
Social and cultural impacts	<ul> <li>High. There are a broad range of social and cultural impacts associated with the protection of places with significant historic heritage values, including:</li> <li>Heritage places and their stories help to build understanding between people, contributing to strong communities and social cohesion.</li> <li>Heritage places, and their ongoing use and conservation, provides for intergenerational connection. Historic heritage provides a tangible connection between present generations and past generations, and protection of historic heritage ensures that this connection is maintained for future generations.</li> <li>Historic heritage places provide educational benefits, by providing tangible examples of past ways of living, working, and using the environment.</li> <li>The protection of historic heritage places contributes to diversity and choice of buildings and structures within the urban environment, which contributes to a well-functioning urban environment that serves the needs of a diverse community.</li> </ul>

Matter	Analysis
Environmental impacts	<ul> <li>Moderate. There are a range of environmental impacts associated with the protection of places with significant historic heritage values, including:</li> <li>Stewardship over a finite physical resource that, if lost, cannot be readily replaced.</li> <li>Maintenance of existing buildings and structures in continuing use, which reduces the need for resources to be expended on new buildings or structures.</li> </ul>
Health and safety impacts	<b>Moderate.</b> While the number of buildings and structures covered by the provisions is limited, the provisions recognise the need to undertake upgrades to existing buildings and structures to provide for seismic strengthening, fire protection, and accessibility upgrades.
Degree of interest from mana whenua	<b>Low.</b> There has been a low degree of interest from mana whenua on the provisions of the Historical Heritage chapter.
Degree of interest from the public	<b>High.</b> There is a high degree of interest from the public. Several heritage-related institutions, special interest groups, community groups, property owners, and members of the public submitted on the historic heritage aspects of the draft District Plan.
Degree of risk or uncertainty	<b>Low.</b> There is a low degree of risk or uncertainty associated with the provisions. The regulation of modifications to historic heritage through rules in District Plans is a common and well-understood method, and the approach adopted by the proposed District Plan is

Matter	Analysis
	consistent with other recent District Plans in the
	Wellington Region (particularly the Wellington
	City District Plan and the Porirua District Plan).

(85) Accordingly, the overall scale and significance of the effects of the provisions associated with historical heritage are moderate to high.

# 6 Proposed District Plan objectives and provisions

# 6.1 Overall approach

(86) Consistent with the National Planning Standards, the objectives and provisions for historical heritage operate as an overlay. Specifically:

- Objectives, policies, and rules for historical heritage are set out in the HH – Historical Heritage chapter (with some related provisions being located in other district-wide chapters, including subdivision, earthworks, signs, temporary activities, and infrastructure).
- Schedules, in conjunction with the District Plan maps, identify the buildings, structures, and areas to which the provisions of the HH – Historical Heritage chapter (and related provisions) apply.
- (87) The overlay approach means that the provisions for historical heritage, where applicable, operate in addition to the provisions of the underlying zone.
- (88) The HH Historical Heritage chapter sets out:
  - 2 objectives for historical heritage.
  - 14 policies for historical heritage.
  - 7 rules for a range of different activities associated with historical heritage.
  - 3 standards that apply to some of the activities provided for in the rules.
- (89) Related provisions include:
  - In the SUB Subdivision chapter, 2 policies and 1 rule for subdivision in relation to heritage buildings, structures, or areas.
  - In the INF Infrastructure chapter, 1 policy and 25 rules for different types of infrastructure or infrastructure activities in relation to sites containing heritage buildings or structures, or heritage areas.

- In the EW Earthworks chapter, 1 objective, 1 policy, 1 rule, and 1 standard for earthworks in relation to heritage buildings, structures, or areas.
- In the SIGN Signs chapter, 1 policy, 1 rule, and 1 standard for signs in relation to heritage buildings, structures, or areas.
- In the TEMP Temporary Activities chapter, 1 policy and 3 standards for temporary activities and temporary buildings and structures in relation to heritage buildings, structures, or areas.
- (90) There are also non-regulatory methods outside the District Plan that the Council uses to support the protection of historic heritage. This the Built Heritage Incentive Fund, rates remission, and publishing information on the historic heritage values associated with heritage buildings, structures, and areas. This includes the Built Heritage Incentive Fund, rates remission, and publishing information on heritage buildings. These are outlined further at the end of this section.

# 6.2 Proposed objectives, policies, and rules

(91) The following section sets out the proposed objectives, policies, and rules that relate to the historical heritage topic. These objectives and provisions are principally located in the HH – Historical Heritage chapter of the proposed District Plan, although there are relevant provisions located in other district-wide chapters.

## 6.2.1 Objectives

(92)

Objective HH-O1 responds to resource management issue 1, which is recognising and protecting significant historic heritage. Proposed objective HH-O1 is as follows:

HH-O1Historic heritage values are recognised and protectedSignificant historic heritage values associated with buildings, structuresand areas are recognised and protected from inappropriatesubdivision, use and development.

(93) Objective HH-O2 responds to resource management issue 2, which is providing for the sustainable long-term use of historic heritage. Proposed objective HH-O2 is as follows:

#### HH-O2 Sustainable long-term use

Buildings, structures, and areas with significant historic heritage values are well-maintained, resilient, and kept in sustainable long-term use.

### 6.2.2 Policies and rules

- (94) There is significant overlap between the policies and rules, and the objective that they seek to achieve. In other words, many of the provisions are intended to achieve both objectives. This is because the objectives themselves are interrelated. In particular, objective HH-O2 supports achieving objective HH-O1 by providing for the long-term use as a means of providing for the on-going protection of significant historic heritage values.
- (95) The following table sets out the policies and rules, and the objectives that they seek to achieve.

	Relevant objective	Policy	Rules
	HH – Histo	rical Heritage chapter	
$\langle \rangle$	HH-OI	HH-P1 Identify significant historic heritage	Refer to the schedules described in section 6.3 below.
	НН-ОІ	HH-P2 Identifying historic heritage within heritage areas	Refer to the schedules described in section 6.3 below.

	and cultural and	
	historic heritage	

(96) The proposed objectives and provisions for the HH – Historical Heritage chapter are set out in Attachment 1 to this report. Refer to the relevant Section 32 Evaluation Reports for further information on the provisions for subdivision, earthworks, signs, temporary activities, and infrastructure.

### 6.2.3 Standards

(97) The Historic Heritage chapter includes three standards (HH-S1, HH-S2, and HH-S3) that apply to additions, alterations, relocation, and new buildings in heritage areas. The purpose of these standards is to set out the built form anticipated in the Jackson Street, Heretaunga Settlement, and Riddlers Crescent Heritage Areas, be specifying appropriate building height, height in relation to boundary, and setback standards. These standards are similar to standards for the same areas set out in the operative District Plan.

# 6.3 Schedules

- (98) There are two schedules relevant to the provisions of the HH Historical Heritage chapter:
  - Schedule of Heritage Buildings and Structures
  - Schedule of Heritage Areas
- (99) The Schedule of Heritage Buildings and Structures identifies the places where the rules relevant to heritage buildings and heritage structures apply. This schedule sets out the following information:
  - A unique identifier for each scheduled building or structure.
  - The address of the building or structure
  - The name or description of the building or structure
  - The legal description of the site on which the building or structure is located
  - Identification of whether the building or structure is included in the New Zealand Heritage List/Rārangi Kōrero, and if so, the entry number and listing type
  - The evaluated significance of the historic heritage values associated with the building or structure (in accordance with the Heritage Inventory report)
- (100) The Schedule of Heritage Areas identifies the areas where the rules relevant to buildings, structures, and other activities in heritage areas apply. This schedule sets out the following information:
  - A unique identifier for each scheduled heritage area

- A name describing the heritage area
- A list of the scheduled heritage buildings and structures located within the area
- A list of contributing buildings located within the area
- Identification of whether the area is included in the New Zealand Heritage List/Rārangi Kōrero, and if so, the entry number of the area
- The evaluated significance of the historic heritage values associated with the area (in accordance with the Heritage Inventory report)
- (101) Buildings, structures, and areas identified within both schedules are identified in the proposed District Plan maps using the symbology prescribed under the National Planning Standards.
- (102) The proposed Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas are set out in Attachment 2 to this report.

# 6.4 Non-regulatory methods

- (103) The proposed approach is supported by a range of non-regulatory methods outside of the District Plan that support the protection of historic heritage. These include:
  - A Built Heritage Incentive Fund under the Council's Taonga Tuku Iho Heritage Policy 2021. This fund provides for \$1,500,000 of funding between 2021 and 2031 to offer grants for up to half the value of costs associated with:
    - Specialist advice
    - Conservation plans
    - Building and resource consent fees
    - Emergency building work
    - Seismic strengthening work
    - Conservation and restoration building work.
  - Rates remission (as set out in the Council's Rates Remission Policy) which provides for a remission of up to 100% of the general rate where the rating unit includes a historic building, structure, or place identified in the District Plan or proposed District Plan, and the owner has voluntarily protected those features through a covenant or other legal mechanism.

• Publishing heritage inventory reports to provide publicly available information on the heritage significance of each place included within the District Plan Schedules of Heritage Buildings, Structures, and Areas.

# 7 Evaluation of objectives

- (104) This section is the evaluation of objectives, as required by section 32(1)(a) of the RMA.
- (105) An objective is a statement of what is to be achieved through the resolution of a particular resource management issue. A district plan objective should set out a desired end state to be achieved through the implementation of policies and rules.
- (106) Under s75(1)(a) of the RMA, a district plan must state the objectives for the district.
- (107) Under s32(1)(a) of the RMA, an evaluation report required under the RMA must examine the extent to which the objectives of the proposal being evaluated are the most appropriate way to achieve the purpose of the RMA. The purpose of the RMA, as stated in s5(1) of the RMA, is to promote the sustainable management of natural and physical resources.
- (108) In the following sections, each proposed objective is evaluated by considering its relevance, usefulness, reasonableness, and achievability, in terms of achieving the sustainable management purpose of the RMA. While not required by section 32 of the RMA, alternatives to the proposed objective are also considered. After considering alternatives, the appropriateness of the proposed objective for achieving the sustainable management purposed of the RMA is summarised.

# 7.1 Evaluation of objective HH-O1

#### **Proposed objective**

(109) Proposed objective HH-O1 is as follows:

нн-01	Historic heritage values are recognised and protected		
Significant h	Significant historic heritage values associated with buildings, structures		
and areas c	and areas are recognised and protected from inappropriate		
subdivision,	use and development.		

### (110) The following table provides an evaluation of the proposed objective:

Consideration	Evaluation
Relevance	
Addresses a relevant resource management issue	Yes. The objective addresses resource management issue 1, which is the recognition and protection of significant historic heritage (see section Error! Reference source not found. of this report).
Assists the Council to undertake its functions under section 31 of the RMA	<b>Yes.</b> The objective sits under the Council's functions under s31(1)(a) (integrated management of the effects of the use, development, or protection of land and associated natural and physical resources of the district) and s31(1)(b) (the control of any actual or potential effects of the use, development, or protection of land).
Gives effect to matters set out in sections 6, 7, or 8 of the RMA	<b>Yes.</b> The objective gives effect to section 6(f) of the RMA (the protection of historic heritage from inappropriate subdivision, use, and development).
	The objective also provides for section 7(aa) (the ethic of stewardship), section 7(c) (the maintenance and enhancement of amenity values), section 7(f) (the maintenance and enhancement of the quality of the environment), and section 7(g) (the finite characteristics of historic heritage resources).
Gives effect to higher- order planning documents	<b>Yes.</b> The objective gives effect to Policy 21 (identifying places, sites, and areas with significant historic heritage values) and Policy 22 (protecting historic heritage values) of the

Consideration	Evaluation
	Regional Policy Statement for the Wellington Region.
Usefulness	·
Guides decision- making	<b>Yes.</b> The objective guides decision making by directing that decision-makers both recognise and protect significant historic heritage values when making decisions. The term "inappropriate" before subdivision, use, and development ensures that decision-makers are able to consider proposals on a case-by-case basis, in relation to the values that are sought to be protect.
Demonstrates good practice for drafting of objectives	<b>Yes.</b> The drafting of the objective avoids uncertainty by using language that is consistent with language used in Policy 22 of the RPS and section 6(f) of the RMA.
Reasonableness	
Will not impose unjustifiably high costs on the community/parts of the community	<b>Yes.</b> While the protection of historic heritage imposes costs on parts of the community that own property with historic heritage values, those costs are principally (but not entirely) opportunity costs. The protection of historic heritage also imposes costs on the Council, in terms of the support that it provides to owners of properties with historic heritage values. However, these costs are not unjustifiable in light of the requirement for Council to recognise and provide for section 6(f) of the RMA and give effect to Policies 21 and 22 of the RPS.

Consideration	Evaluation
Acceptable level of uncertainty and risk	<b>Yes.</b> The provisions that achieve the objective are limited in application to only those places where there is evidence of significant historic heritage values.
Achievability	
Consistent with identified tangata whenua or community outcomes	<b>Partially.</b> While some parts of the community wish to see places with significant historic heritage values protected from inappropriate subdivision, use and development, other parts of the community consider that this leads to an inappropriate level of restriction on the ability for people modify or develop their property.
Realistically able to be achieved within the Council's powers, skills, and resources	<b>Yes.</b> The protection of significant historic heritage values from inappropriate subdivision, use, and development is a well- understood concept with established practices that have been implemented by the Council in the past. The Council has provided resourcing to support this through its Long- term Plan.

## Alternative objectives

(111) The following table provides a summary of the alternative objectives that have been considered:

Alternative objective	Evaluation
Status quo (operative District Plan) objective:	• The status quo objective does not closely align with the

Alternative objective	Evaluation
To ensure that the heritage values of identified heritage buildings and structures are not unnecessarily lost through demolition or relocation, or compromised by any additional work.	<ul> <li>language used in Policies 21 and 22 of the RPS.</li> <li>The objective provides for all historic heritage values, rather than significant historic heritage values. This is particularly onerous, and not readily achievable or justifiable.</li> <li>The focus on necessity, rather than appropriateness, renders the objective ineffective as all intentional modifications (including demolition) to a place with heritage values could be described as being necessary.</li> <li>The objective focusses on buildings and structures but does not recognise the significant historic heritage values associated with areas.</li> </ul>
Alternative: no objective for the protection of significant historic heritage values	<ul> <li>Having no objective would not recognise and provide for section 6(f) of the RMA.</li> <li>Having no objective would be contrary to the requirement for the District Plan to give effect to Policy 21 and Policy 22 of the RPS.</li> </ul>

#### Summary

(	(112)	In summary, the proposed objective is considered to be the most
		appropriate way to achieve the purpose of the RMA because:

- The objective responds to the resource management issue of protecting historic heritage.
- The objective gives effect to Part 2 of the RMA because it is consistent with the need to recognise and provide for the protection of historic heritage from inappropriate subdivision, use and development set out in section 6(f) of the RMA.
- The objective gives effect to Policies 21 and 22 of the RPS, which requires that the District Plan identifies and protects places, sites, and areas with significant historic heritage values from inappropriate subdivision, use, and development.
- The objective guides decision-making and is drafted in a manner that is consistent with the language use in the RPS.
- The objective is reasonable in light of the requirements of higher-order planning documents, and while it imposes some costs on the Council and parts of the community, these costs are not unreasonable.
- The objective is achievable as the protection of historic heritage is a well-understood concept with established practices that have been implemented by the Council in the past, and the Council has set aside resourcing to achieve the objective.

# 7.2 Evaluation of objective HH-O2

Proposed objective HH-O2 is as follows:

#### **Proposed objective**

НН-02	Sustainable long-term use
Buildings, structures, and areas with significant historic heritage value are well-maintained, resilient, and kept in sustainable long-term use.	

(114) The following table provides an evaluation of the proposed objective:

(113)

Consideration	Evaluation
Relevance	
Addresses a relevant resource management issue	Yes. The objective addresses resource management issue 2, which is providing for the sustainable long-term use of historic heritage (see section Error! Reference source not found. of this report). The objective seeks to recognise the sustainable long-term use of historic heritage as means of facilitating the protection of heritage, and ensuring that heritage places contribute to the social, cultural, and economic wellbeing of the community.
Assists the Council to undertake its functions under section 31 of the RMA	<b>Yes.</b> The objective sits under the Council's functions under s31(1)(a) (integrated management of the effects of the use, development, or protection of land and associated natural and physical resources of the district) and s31(1)(b) (the control of any actual or potential effects of the use, development, or protection of land).
Gives effect to matters set out in sections 6, 7, or 8 of the RMA	Yes. The objective gives effect to section 6(f) of the RMA (the protection of historic heritage from inappropriate subdivision, use, and development), on the basis that the ongoing use of places with historic heritage values supports the ongoing protection of those values. The objective also provides for section 7(aa) (the ethic of stewardship), section 7(b) (the efficient use and development of physical

Consideration	Evaluation
	resources), and section 7(i) (the effects of climate change).
Gives effect to higher- order planning documents	<b>Yes.</b> The objective gives effect to Policy 22 (protecting historic heritage values) of the Regional Policy Statement for the Wellington Region, on the basis that the ongoing use of places with historic heritage values supports the ongoing protection of those values.
Usefulness	
Guides decision- making	<b>Yes.</b> The objective supports well-reasoned decision-making by making it clear that the protection of historic heritage values includes measures (such as alterations, additions, and other modifications) that would provide for the sustainable long-term use of places with significant historic heritage values.
Demonstrates good practice for drafting of objectives	<b>Yes.</b> The objective uses clear and concise language that is consistent with similar objectives adopted by other recent District Plans within the Wellington region.
Reasonableness	
Will not impose unjustifiably high costs on the community/parts of the community	<b>Yes.</b> The objective will not impose additional costs on the community or parts of the community.
Acceptable level of uncertainty and risk	<b>Yes.</b> In conjunction with policies and rules that provide for case-by-case assessment of the appropriateness of modifications to a place to provide for its on-going use, the level

Consideration	Evaluation	
	of uncertainty and risk associated with the	
	objective is acceptable.	
Achievability		
Consistent with	Yes. Feedback from the community indicates	
identified tangata	that there is a desire for places with	
whenua or community	significant historic heritage values to be kept	
outcomes	in use, and a need to acknowledge that	
	places need to be safe to use, recognise the	
	need to undertake upgrades in accordance	
	with the Building Act, and contribute to the	
	health and wellbeing of the community.	
Realistically able to be	Yes. The Council has experience in assessing	
achieved within the	the appropriateness of modifications to	
Council's powers, skills,	places with significant historic heritage

# Alternative objectives

(115)

The following table provides a summary of the alternative objectives that have been considered:

Alternative objectives	Evaluation
Status quo (operative District Plan) objective: To allow a wider range of activities to assist in the retention of heritage buildings.	The objective effectively seeks to promote adaptive re-use of heritage buildings by providing a more lenient approach to the consideration of activities within heritage buildings that are not consistent with the range of activities sought by the underlying zone provisions.

Alternative objectives	Ev	aluation
	•	While well intentioned, the
		objective is narrowly focussed
		on activities in relation to
		heritage buildings and does not
		recognise the broader issues
		associated with providing for
		the ongoing use of heritage
		buildings and structures
		(including seismic
		strengthening, upgrades
		required by the Building Act,
		and other modifications that
		might support the ongoing use
		of heritage buildings or
		structures).
		The absence of an objective
Alternative: no objective	•	The absence of an objective recognising the need to provide
		for ongoing use of heritage
		buildings, structures or areas
		means that the package of
		objectives would be singularly
		focussed on protection.
	•	' This risks a narrow focus on the
		preservation of places with
		heritage values, and the
		exclusion of other methods that
		provide for the protection of
		heritage values (including
		modifications to provide for
		seismic strengthening or to
		enable adaptive re-use).
	•	This would not recognise the

Alternative objectives	Evaluation	
	the continued use of heritage	
	buildings, structures, and areas,	
	and for those places to be kept	
	in a sound and safe condition.	

# Summary

(116)

In summary, the proposed objective is considered to be the most appropriate way to achieve the purpose of the RMA because:

- The objective responds to the resource management issue of providing for the sustainable-long term use of historic heritage. The objective seeks to recognise the sustainable long-term use of historic heritage as means of facilitating the protection of heritage, and ensuring that heritage places contribute to the social, cultural, and economic wellbeing of the community.
- The objective gives effect to Part 2 of the RMA because it recognises that ongoing use of places with historic heritage values facilitates the protection of those values from inappropriate subdivision, use, and development, and provides for the efficient use of a finite physical resource.
- The objective guides decision-making by making it clear that the protection of historic heritage values may include measures (such as alterations, additions, or other modifications) that would provide for the ongoing use of places with significant historic heritage values.
- The objective does not impose unreasonable costs on the community and is consistent with outcomes sought by the community.

# 8 **Evaluation of Policies and Rules**

- (117) Policies and rules seek to achieve the objectives of a plan.
- (118) Policies of a district plan are the course of action to achieve or implement the plan's objective (i.e. the path to be followed to achieve a certain, specified, environmental outcome). Rules of a district plan implement the plan's policies and have the force and effect of a regulation.
- (119) Under s32(1)(b) of the RMA, an evaluation report required under the RMA must examine whether the provisions in the proposal are the most appropriate way to achieve the objectives by–
  - (i) identifying other reasonably practicable options for achieving the objectives; and
  - (ii) assessing the efficiency and effectiveness of the provisions in achieving the objectives; and
  - (iii) summarising the reasons for deciding on the provisions.
- (120) Under s32(2) of the RMA, the assessment of the efficiency and effectiveness of the provisions must:

(a) identify and assess the benefits and costs of the environmental, economic, social, and cultural effects that are anticipated from the implementation of the provisions, including the opportunities for—

- (i) economic growth that are anticipated to be provided or reduced; and
- (ii) employment that are anticipated to be provided or reduced; and
- (b) if practicable, quantify the benefits and costs referred to in paragraph (a); and

(c) assess the risk of acting or not acting if there is uncertain or insufficient information about the subject matter of the provisions.

(121) There are two objectives for historical heritage, being:

нн-01	Historic heritage values are recognised and protected		
Significant historic heritage values associated with buildings, structures and areas are recognised and protected from inappropriate subdivision, use and development.			
НН-02	Sustainable long-term use		
Buildings, structures, and areas with significant historic heritage values are well-maintained, resilient, and kept in sustainable long-term use.			

- (122) The outcomes sought by these objectives, and the resource management issues that they respond to, are sufficiently integrated that it is appropriate to evaluate the provisions that achieve them as a package. The Council has considered four approaches to achieve these objectives, being:
  - Option 1: the proposed approach. This option includes a range of new policies and rules, as well as an expanded Schedule of Heritage Buildings and Structures, and Schedule of Heritage Areas that seek to protect significant historic heritage values from inappropriate subdivision, use, and development, while providing for a range of modifications that support or enable the continued use or adaptive re-use of places with significant historic heritage values. This option is supported by non-regulatory methods such as the Built Heritage Incentive Fund, rates remission, and publishing information on the historic heritage values associated with heritage buildings, structures, and areas.

- **Option 2: status quo.** This would retain the operative policies and rules for historic heritage set out in chapter 14F of the operative District Plan. This includes retaining the operative District Plan schedules of heritage buildings, structures, and areas.
- **Option 3: a voluntary approach.** This approach adopts the same policies and rules as the proposed approach but would only include items in the schedules of heritage buildings, structures, or areas, where property owners volunteer a building, structure, or area, to be included in the schedule (and conversely, where buildings, structures, or areas have not been volunteered, they would not be included in the schedules).
- **Option 4: a non-regulatory approach.** This approach would not include any policies, rules, or schedules for historical heritage in the District Plan, and instead rely on non-regulatory approaches (such as education and financial incentives).
- (123) The following tables provide an evaluation of each of these options.

Option 1: Proposed approach			
Policies (HH – Historical Heritage chapter): • HH-P1: Identify significant historic heritage	Costs	Benefits	Risk of Acting / Not Acting if there is uncertain or insufficient information about the subject matter of the provisions
<ul> <li>HH-P2: Identifying historic heritage within heritage areas</li> <li>HH-P3: Enable maintenance and repair</li> </ul>	<ul> <li>Environmental</li> <li>No specific environmental costs identified.</li> </ul>	<ul> <li>Environmental</li> <li>Continued use of a finite physical resource.</li> <li>Retaining existing</li> </ul>	It is considered that there is certain and sufficient information about the subject

- HH-P4: Continued use
   and adaptive reuse
- HH-P5: Healthy and energy efficient heritage buildings
- HH-P6: Seismic strengthening, fire safety and accessibility
- HH-P7: Alterations, additions and partial demolition
- HH-P8: Relocation within the site
- HH-P9: Relocation outside
   the site
- HH-P10: New buildings and structures on the site of a heritage building or heritage structure
- HH-P11: Total demolition of heritage buildings and heritage structures

#### Economic

- Development opportunity costs. Opportunity costs for landowners where the presence of a heritage building, heritage structure, or heritage area may otherwise restrict the scale or intensity of development that might otherwise occur on the site. This may have flowon effects for economic activity associated with development that may have otherwise occurred at the site. Modification costs. Costs •
- associated with modification of heritage buildings and structures

buildings in continued use provides for the efficient use of a finite physical resource (buildings with significant historic heritage values). This provides for those heritage values to continue to contribute to the environment and the wellbeing of present and future generations.

Efficient upgrading of heritage buildings. Provisions that support energy efficiency, internal environmental quality, structural resilience, fire protection, and accessibility of heritage buildings enable those buildings to support the health, safety, and matter of the provisions because:

- The provisions are
   informed by extensive
   background research,
   including the
   identification of places
   and areas with
   significant historic
   heritage values.
- The provisions were consulted on with the community as part of consultation on the draft District Plan. This included seeking the feedback of owners of places proposed to be included in the Schedule of Heritage Buildings and Structures and Schedule of Heritage Areas. The

- HH-P12: Total demolition of contributing buildings or structures in heritage areas
- HH-P13: Redevelopment of non-contributing buildings or structures in heritage areas
- HH-P14: New buildings and structures in heritage areas

# Policies (other chapters)

- INF-P17: New or upgraded infrastructure in other overlays
- SUB-P16: Subdivision of land containing heritage buildings and heritage structures

may be higher than for ordinary construction where specialist materials or construction methods need to be used.

- Insurance costs. Heritage listings can lead to some insurance-related costs, such as increased premiums or excess, or aspects of restoration or reconstruction being excluded from an insurance policy. See section 4.2.6 for further information on insurance and heritage buildings.
- Consenting costs.
   Consenting costs

   associated with works to
   heritage buildings,
   heritage structures, or in
   heritage areas, although

wellbeing of building users, and the nearby public.

- Contribution to amenity values. Providing for the protection of historic heritage values enables those values to continue to contribute to the quality of the surrounding environment, and the amenity values within that environment.
- Retaining embodiedcarbon of buildings andstructures and reducingdemolition waste.Conserving and re-usingheritage buildings retainstheir fabric, and thehuman effort expended intheir construction.Retaining buildings limits

proposed provisions (including the schedules) were refined in response to this feedback.

 Not acting could risk the permanent loss of identified significant historic heritage values.

- SUB-P17: Subdivision of land within heritage areas
- EW-P8: Earthworks on sites with heritage buildings or heritage structures, or within heritage areas
- SIGN-P6: Signs on heritage buildings or heritage structures or in heritage areas
- TEMP-P4: Manage temporary activities to minimise adverse effects on public access, health and safety, the natural environment, and cultural and historic heritage values

these costs are partly offset by Council waiving up to 50% of consent fees.

Council costs. Potential
 financial costs to Council
 associated with providing
 financial incentives for
 conservation work,
 waiving resource and
 building consent
 application fees, and
 providing rates remission
 in accordance with the
 Council's rates remission
 policy.

Social

• Foregone development capacity. The potential foregone development capacity as a result of the provisions may lead to emissions and the adverse environmental effects of disposing of demolition waste.

#### Economic

- Continued use and adaptive re-use. The provisions enable the continued use and adaptive re-use of heritage buildings and structures, which in turn enables existing assets to provide space to support commercial and residential activity, and support economic development.
- Focal point for economic activity in the urban environment. Heritage

# Rules (HH – Historical Heritage chapter)

- HH-R1: Maintenance and repair of heritage buildings, heritage structures, and buildings and structures in heritage areas
- HH-R2: Alterations and additions to heritage buildings, heritage structures, and buildings and structures in heritage areas
- HH-R3: Partial demolition of heritage buildings, heritage structures, and buildings and structures in heritage areas
- HH-R4: Relocation of heritage buildings, heritage structures, and

social opportunity costs associated with foregone housing supply or business development capacity on sites subject to the provisions.

#### Cultural

- No specific cultural costs identified.
- buildings can function as a recognisable and identifiable focal point for local commercial economic activity, and the Jackson Street Heritage Area is an example of this.
- Tourist/visitor activity.
   Heritage places (including for example the Matiu/Somes Island
   Heritage Area, Jackson
   Street Heritage Area,
   Ōrua-pouanui/Baring
   Head Heritage Area, and
   Petone Settlers Museum)
   encourage economic
   activity associated with
   tourism by providing
   memorable places that
   attract people to visit and
   spend time in Lower Hutt.

	Effectiveness	Efficiency
Effectiveness and efficiency	<ul> <li>The proposed provisions are the most effective method of achieving the objectives, because:</li> <li>The proposed Schedules identify a broad range of places and areas across Lower Hutt that have significant historic heritage values.</li> <li>The proposed provisions provide for the protection of places with significant historic heritage values through a range of provisions that support maintenance and repair, provide for control over modification and subdivision, and seek to avoid relocation or total demolition.</li> </ul>	<ul> <li>The proposed provisions are the most efficient method of achieving the objectives, because:</li> <li>The benefits of the proposed provisions (as set out above) are widely distributed, attributed to the wider public, and accrue to present and future generations. While there are costs associated with the provisions, these are limited and local in nature, and are in part off-set by support and incentives made available by the Council.</li> <li>The provisions are generally well understood and are generally</li> </ul>

Option 1: Proposed approach			
	The proposed provisions recognise that     consistent with similar provisions for     provisions of places with beritage		
	ongoing use of places with heritagehistoric heritage used throughout thevalues supports the protection of thoseregion.		
	values, by providing for modifications to		
	improve the health, safety, and		
	accessibility of heritage places, and providing for modifications or new		
	buildings that support the ongoing use of		
	heritage places.		
	This option is the most appropriate way to achieve the objectives, and consequently the		
	<ul> <li>purpose of the RMA, because:</li> <li>The provisions appropriately identify places with significant historic heritage values.</li> </ul>		
	The provisions provide clear rules and policy direction to protect significant historic     heritage values by enabling maintenance and repair, controlling modification, new		
Overall evaluation	development, and subdivision, and seeking to avoid demolition and relocation.		
	• The provisions recognise that ongoing use of heritage places supports the protection of		
	significant historic heritage values, by providing clear rules and policy direction that		
	enables modifications to provide for the health, safety, and accessibility of heritage		
	places, and enabling modifications and new buildings that support the ongoing use of heritage places.		

Option 1: Proposed approach	
	<ul> <li>The provisions are based on robust information, including expert evidence and feedback received from the public and property owners on the draft District Plan.</li> <li>The provisions give effect to Policies 21 and 22 of the RPS.</li> <li>The provisions are consistent with the Council's obligation to have regard to the New Zealand Heritage List/Rārangi Kōrero.</li> <li>The provisions are consistent with the Council's obligations to recognise and provide for the protection of historic heritage from inappropriate subdivision, use, and development under section 6(f) of the RMA. The provisions are also consistent with the Council's obligation to have regard to the matters under section 7(aa), (b), (c), (f), (g), and (i) of th RMA.</li> </ul>

Option 2: Status quo			
Retain policies, rules, and schedules set out in chapter 14F of the operative District Plan. This includes: <b>Policies:</b>	Costs	Benefits	Risk of Acting / Not Acting if there is uncertain or insufficient information about the subject matter of the provisions
<ul> <li>A policy to protect the exterior of buildings and</li> </ul>	Environmental	Environmental	It is considered that there is certain and sufficient

# Option 2: Status quo

- structures from inappropriate repairs, alterations, and additions.
- A policy to ensure thorough assessment of the need for and alternatives to relocation or demolition.
- A policy to allow a wider range of activities in heritage buildings.

#### Rules

- A permitted activity rule for internal alterations and minor repair, alteration, or maintenance to the exterior.
- A restricted discretionary activity rule for exterior
- Potential for permanent • loss of a finite physical resource. To the extent that places with significant historic heritage values that have been identified by the Council are not recognised or protected for under this option, there is a risk that those places are permanently lost under this option. This includes the permanent loss of the significant heritage values associated with those places, along with any contribution those places make towards the quality or amenity values of the surrounding environment.

The environmental benefits associated with this option are similar to Option 1, except that:

- Environmental benefits
   associated with the
   continued use and
   efficient upgrading of
   existing buildings are less
   likely to occur under this
   option, as these outcomes
   are not specifically
   enabled by the status quo
   provisions.
- The extent to which the remaining identified environmental benefits are realised is likely to be reduced in scale due to the reduced extent to which this option identifies and protects

information about the subject matter of the provisions because:

- The Council has undertaken extensive background research, including the identification of places and areas with significant historic heritage values.
- The Council has consulted with the community on provisions to recognise and provide for historic heritage as part of consultation on the draft District Plan.

However, acting by adopting this option could risk the following:

alteration, repair, or	Economic	places with significant	The permanent loss of
modification that is not	The economic costs	historic heritage values.	significant historic
<ul> <li>permitted.</li> <li>A discretionary activity rule for demolition or relocation.</li> <li>A discretionary activity rule activities within a heritage building or structure that are not within the provisions of</li> </ul>	<ul> <li>associated with this option are similar to Option 1, except that:</li> <li>The economic costs identified are likely to be reduced in scale due to the reduced extent to which this option identifies and protects</li> </ul>	Economic The economic benefits associated with this option are similar to Option 1, except that: • Economic benefits associated with the continued use and	heritage values associated with places that have been identifie as having significant historic heritage values, but which are not recognised and provide for through the District Plan.
the underlying activity area.	<ul><li>places with significant</li><li>historic heritage values.</li><li>Economic costs</li></ul>	efficient upgrading of existing buildings are less likely to occur under this	<ul> <li>Unreasonably restricting modifications to heritage places that provide for</li> </ul>
<ul> <li>I09 scheduled heritage buildings and heritage structures identified in Appendix 1 and Appendix 2 to chapter 14F.</li> </ul>	associated with the uncertainty inherent in the regulation of maintenance and repair, as well as consenting costs for minor modifications to improve the health and safety of	<ul> <li>option, as these outcomes are not specifically enabled by the status quo provisions.</li> <li>The extent to which the remaining identified economic benefits are realised is likely to be reduced in scale due to</li> </ul>	their health, safety, and accessibility, or which provide for the continue use or adaptive re-use those places.

# **Option 2: Status quo**

 3 heritage areas identified in Appendix 3 to chapter 14F.

## Precincts

- 2 heritage precincts

   located in the High
   Density Residential
   Activity Area (Heretaunga
   Settlement Heritage
   Precinct and the Riddlers
   Crescent Heritage
   Precinct)
- heritage buildings, are likely to be higher under this option compared to Option 1.

### Social

•

- Foregone development capacity. The potential foregone development capacity as a result of the provisions may lead to social opportunity costs associated with foregone housing supply or business development capacity on sites subject to the provisions. However, the costs associated with this will be less than for Option 1, on the basis that this option provides for
- the reduced extent to which this option identifies and protects places with significant historic heritage values.

### Social

The social benefits associated with this option are similar to Option 1, except that:

• The extent to which the identified social benefits are realised is likely to be reduced in scale due to the reduced extent to which this option identifies and protects places with significant historic heritage values.

# Cultural

Option 2: Status quo		
	reduced recognition of places with significant historic heritage values. <b>Cultural</b> • Permanent loss of places with historic heritage significance. There is a risk that places with significant historic heritage value, including places of value to the community or parts of the community, are lost under this option, to the extent that places with significant historic heritage value that have been identified by the Council are not recognised or provided for under this option.	The cultural benefits associated with this option are similar to Option 1, except that: • The extent to which the identified cultural benefits are realised is likely to be reduced in scale due to the reduced extent to which this option identifies and protects places with significant historic heritage values.

Option 2: Status quo			
	Effectiveness	Efficiency	
Effectiveness and efficiency	<ul> <li>This option is a less effective method of achieving the objectives than Option 1, because:</li> <li>The schedules do not identify the full extent of the places that the Council has identified as having significant historic heritage values, and as a result, the provisions do not recognise or provide for these places.</li> <li>The provisions to not provide sufficient clarity, through policies and rules, about the protection of significant historic heritage values from inappropriate subdivision, use, or development.</li> <li>The provisions do not recognise the need to provide for a reasonable degree of modification to support heritage places to</li> </ul>	Efficiency This option is a less efficient method of achieving the objectives than Option 1, because: Reduced clarity of the status quo provisions (including around maintenance and repair), as well as lack of recognition for minor health and safety upgrades, is likely to lead to a greater consenting burden for minor works under this option. This option does not recognise or provide for the benefits that providing for continued use or adaptive re-use of heritage places contributes towards protecting significant historic heritage values.	
	provide for the health, safety, and accessibility of their occupants, nor do they specifically provide for modifications		

Option 2: Status quo	
	that would enable heritage places to be retained in ongoing use.
Overall evaluation	<ul> <li>This option is a less appropriate way to achieve the objectives, and consequently the purpose of the RMA, compared to Option I, because:</li> <li>This option will lead to a gap between the places with significant historic heritage values that are recognised and provided for in the District Plan, and the places where the Council has information that demonstrates there are significant historic heritage values.</li> <li>The policies and rules under this option are less clear about the extent to which significant historic heritage values are to be protected, and less clear about the extent to which maintenance, repair, and minor modifications are appropriate, compared to Option I.</li> <li>The provisions do not recognise the extent to which continued use or adaptive re-use of heritage places contributes towards the efficient and effective recognition and protection of significant historic heritage values.</li> <li>The provisions do not give effect to Policies 21 and 22 of the RPS, nor do they recognise and provide for</li> </ul>
	a range of places that the Council has identified as having significant historic heritage values.

Option 3: Voluntary approach			
This option is the same as <b>Option 1</b> , except that:	Costs	Benefits	Risk of Acting / Not Acting if there is uncertain or insufficient information about the subject matter of the provisions
<ul> <li>Buildings, structures, or areas are only added to the Schedules of Heritage Buildings, Structures, or Areas where they are volunteered or approved by the owner.</li> <li>Buildings, structures, or areas are removed from the Schedules of Heritage Buildings, Structures, and Areas where their inclusion in the schedules is not supported or approved by the owner.</li> </ul>	Environmental Potential for permanent loss of a finite physical resource. To the extent that places with significant historic heritage values that have been identified by the Council are not recognised or provided for under this option, there is a risk that those places are permanently lost under this option. This includes the permanent loss of the significant	<ul> <li>Environmental</li> <li>The environmental benefits associated with this option are similar to Option 1, except that:</li> <li>The extent to which the identified environmental benefits are realised is likely to be reduced in scale to the extent that there is a reduction in the places with significant historic heritage values that are recognised and provided for under this option.</li> </ul>	It is considered that there is certain and sufficient information about the subject matter of the provisions because: • The Council has undertaken extensive background research, including the identification of places and areas with significant historic heritage values. • The Council has consulted with the community on

Option 3: Voluntary approach				
Option 3: Voluntary approach         heritage values         associates with those         places, along with any         contribution those places         make towards the quality         or amenity values of the         surrounding environment. <i>Economic</i> The economic costs         associated with this option are         similar to Option 1, except that:         • The economic costs         identified are likely to be         reduced in scale due to         the reduced extent to         which this option         identifies and protects         places with significant         historic heritage values.		<ul> <li>provisions to recognised and provide for historic heritage as part of consultation on the draft District Plan.</li> <li>However, acting by adopting this option could risk the following:</li> <li>The permanent loss of significant historic heritage values associated with places that have been identified as having significant historic heritage values, but which are not recognised and provided for through the District Plan.</li> </ul>		

	Permanent loss of places	heritage values that are	
	with historic heritage	recognised and provided	
	<b>significance.</b> There is a	for under this option.	
	risk that places with		
	significant historic		
	heritage value, including		
	places of value to the		
	community or parts of the		
	community, are lost under		
	this option, to the extent		
	that places with		
	significant historic		
	heritage value that have		
	been identified by the		
	Council are not		
	recognised or provided		
	for under this option.		
Effectiveness and efficiency	Effectiveness		Efficiency

Option 3: Voluntary approach				
Option 3: Voluntary approach	<ul> <li>This option is a less effective method of achieving the objectives than Option 1, because:</li> <li>To the extent that places with significant historic heritage values are not recognised or provided for under this option, because current or future owners do not approve their recognition within the Schedules of Heritage Buildings, Structures, and Areas, this option will not achieve objective HH-OI.</li> <li>It is highly unlikely that heritage areas with more than one property owner (for example, the Jackson Street Heritage Area) would be provided for under this option, due to the practicality and likelihood of</li> </ul>	<ul> <li>This option is a less efficient method of achieving the objectives than Option 1, because:</li> <li>It is likely to create a high degree of uncertainty about the extent to which the provisions for historic heritage apply at any given time. This is because owners could change their position about whether they approve of the historic heritage provisions applying to their property at any time. Further to this, whether or not owners approve of the heritage provisions applying to their property may change each time the ownership of the property changes.</li> </ul>		
	due to the practicality and likelihood of securing approval from all owners within the heritage area.	<ul> <li>ownership of the property changes.</li> <li>The provisions are likely to lead to a high administrative burden on the Council, who would be required to monitor, enquire on, and seek new approvals each time there is a change in property ownership.</li> </ul>		

Option 3: Voluntary approach				
	The provisions are likely to lead to numerous future changes to the District Plan to address circumstances where approval by current or future property owners' changes over time.			
Overall evaluation	<ul> <li>This option is a less appropriate way to achieve the objectives, and consequently the purpose of the RMA, compared to Option 1, because:</li> <li>This option is likely to lead to a gap between the places with significant historic heritage values that are recognised and provided for in the District Plan, and the places where the Council has information that demonstrates there are significant historic heritage values.</li> <li>This option is likely to be highly inefficient because it creates uncertainty about the extent to which the provisions for historic heritage apply across the district at any given time, places a high on-going administrative burden on the Council, and is likely to lead to numerous future plan changes to reflect changes in the approval of current and future property owners to be subject to the provisions.</li> <li>This option is unlikely to achieve proposed objective HH-OI, to the extent that it leads to places with significant historic heritage values being excluded from the District Plan.</li> <li>This option does not give effect to Policies 21 and 22 of the RPS, nor does it recognise and</li> </ul>			

Option 3: Voluntary approach	
	is not contingent on whether current or future property owners approve of being subject to
	the provisions that give effect to them.

Option 4: Non-regulatory approach				
There are no District Plan policies, rules, or schedules associated with this approach. Rather, the Council would	Costs	Benefits	Risk of Acting / Not Acting if there is uncertain or insufficient information about the subject matter of the provisions

	because:		because:	

Option 4: Non-regulatory app	roach					
	<ul> <li>There is a high degree of uncertainty as to whether incentives and education, on their own, will lead to the protection of places with significant historic heritage values.</li> <li>This option may be counterproductive because of the regulatory uncertainty that it creates. Because this option is inconsistent with the regulatory approaches adopted by other Councils in the region, providing for a non-regulatory approach may encourage the destruction of places with significant historic heritage values, where property owners seek to secure newly established use rights in case the Council chooses to return to a regulatory approach in the future.</li> </ul>	<ul> <li>There is a high degree of uncertainty about the level of incentives that would be necessary to effectively protect places with significant historic heritage values in the absence of a regulatory approach. Because of this, there is a high degree of uncertainty about the costs to Council associated with this option.</li> <li>While this option provides limited benefits in terms of providing for increased scale and intensity of development on some sites, this option also comes with a range of costs that are borne both locally as well as being widely distributed throughout the community.</li> </ul>				
Overall evaluation	<ul> <li>This option is a less appropriate way to achieve the objectives, and consequently the purpose of the RMA, compared to Option 1, because:</li> <li>There is a high degree of uncertainty about whether relying on incentives and education alone, in the absence of a regulatory approach, will be effective at achieving the objectives.</li> </ul>					

Option 4: Non-regulatory appr	oach
	<ul> <li>There is a high degree of uncertainty about the costs to Council of establishing effective incentives in the absence of a regulatory approach.</li> <li>This option does not give effect to Policy 21 or 22 of the RPS, which requires that the District Plan identify places and areas with significant historic heritage values, and include policies and/or rules or other methods that protect these places from inappropriate subdivision, use, or development.</li> <li>Because of the uncertainty associated with the effectiveness of this option, it is unlikely that this option would recognise or provide for section 6(f) of the RMA.</li> </ul>

#### Summary

- (124) Based on the evaluation above, Option 1 (the proposed approach) is the most appropriate method of achieving the objectives for historic heritage for several reasons, including:
  - The provisions appropriately identify places with significant historic heritage values, and provisions provide clear rules and policy direction to protect significant historic heritage values by enabling maintenance and repair, controlling modification, new development, and subdivision, and seeking to avoid demolition and relocation.
  - The provisions recognise that ongoing use of heritage places supports the protection of significant historic heritage values, by providing clear rules and policy direction that enables modifications to provide for the health, safety, and accessibility of heritage places, and enabling modifications and new buildings that support the ongoing use of heritage places.
  - The provisions are based on robust information, including expert evidence and feedback received from the public and property owners on the draft District Plan.
  - The provisions give effect to Policies 21 and 22 of the RPS.
  - The provisions are consistent with the Council's obligation to have regard to the New Zealand Heritage List/Rārangi Kōrero.
  - The provisions are appropriately supported by non-regulatory methods.
  - The costs associated with the proposed approach is reasonable in light of the benefits and the proposed approach provides a more efficient and effective method at protecting historic heritage from inappropriate subdivision, use, and development when compared to the status quo and the alternatives considered.
  - The provisions are consistent with the Council's obligations to recognise and provide for the protection of historic heritage from inappropriate subdivision, use, and development under section 6(f) of the RMA.

# 9 Additional information requirements for qualifying matters

- (125) The Council has a duty to incorporate the Medium Density Residential Standards into each relevant residential zone in the District Plan and is required to give effect to Policy 3 of the NPS-UD within and adjacent to centres zones and rapid transit stops<sup>20</sup>. The ways in which the Council has given effect to these requirements are set out in the Section 32 Evaluation Reports for the Residential Zones and the Centres Zones.
- (126) However, the Council may make the requirements of the MDRS or Policy 3 of the NPS-UD less enabling of development, to accommodate a 'qualifying matter'<sup>21</sup>.
- (127) Some of the provisions of the HH Historical Heritage chapter apply to sites within zones that are otherwise subject to the requirements of the MDRS and Policy 3 of the NPS-UD. These provisions have the effect of being less enabling of development than is otherwise required by the MDRS or Policy 3. In particular:
  - a. The rules for external alterations, additions, partial demolition, relocation, and total demolition of heritage buildings, heritage structures, and contributing buildings in heritage areas (rules HH-R2, HH-R3, HH-R4, and HH-R5) potentially limit the development capacity of those sites.
  - b. The rules for new buildings on sites with heritage buildings or heritage structures, or on sites in heritage areas (rules HH-R6 and HH-R7) potentially limit the development capacity of those sites.

<sup>&</sup>lt;sup>20</sup> Refer to section 77G of the RMA, and Policy 3 of the NPS-UD.

<sup>&</sup>lt;sup>21</sup> Refer to section 77G(6) of the RMA, and Policy 4 of the NPS-UD.

- c. Height standards that apply in the Jackson Street Heritage Area (standard HH-S1) limit the building height in that area to less than is otherwise required by Policy 3 of the NPS-UD.
- d. Height, height in relation to boundary, and setback standards in the Heretaunga Settlement and Riddlers Crescent Heritage Areas (standards HH-S1, HH-S2, and HH-S3) limit these standards to less than is otherwise required by the MDRS or Policy 3 of the NPS-UD.
- e. Height in relation to boundary standards in the Medium Density and High Density Residential Zones adjacent to heritage buildings, heritage structures, or heritage areas.
- f. Subdivision of sites with heritage buildings, heritage structures, or in heritage areas, is a restricted discretionary, rather than a controlled activity (which is required by the MDRS).
- Because of this, the Council is required to include additional information in its Section 32 Evaluation report that<sup>22</sup>:
  - a. Demonstrates why the Council considers that the area is subject to a qualifying matter.
  - b. Demonstrates that the qualifying matter is incompatible with the level of development permitted by the MDRS or provided for by Policy 3 of the NPS-UD.
  - Assesses the impact that limiting development capacity, building height, or density (as relevant) will have on the provision of development capacity.
  - d. Assesses the costs and broader impacts of imposing those limits.
- (129) An analysis which sets out this information in relation to each of the matters is included in Attachment 8.

 $<sup>^{22}</sup>$  Section 77J(3) of the RMA and clause 3.33(2) of the NPS-UD.

## 10 Summary

- (130) This report, including the evaluation, has been prepared to set the context for the Historic Heritage chapter of the proposed District Plan. The evaluation has been undertaken in accordance with section 32 of the RMA in order to identify the need, benefits and costs and appropriateness of the proposed chapter, having regard to its effectiveness and efficiency relative to other means in achieving the purpose of the RMA. The evaluation demonstrates that this proposal is the most appropriate option because:
  - The provisions appropriately identify places with significant historic heritage values.
  - The provisions provide clear rules and policy direction to protect significant historic heritage values by enabling maintenance and repair, controlling modification, new development, and subdivision, and seeking to avoid demolition and relocation.
  - The provisions recognise that ongoing use of heritage places supports the protection of significant historic heritage values, by providing clear rules and policy direction that enables modifications to provide for the health, safety, and accessibility of heritage places, and enabling modifications and new buildings that support the ongoing use of heritage places.
  - The provisions are based on robust information, including expert evidence and feedback received from the public and property owners on the draft District Plan.
  - The provisions give effect to Policies 21 and 22 of the RPS.
  - The provisions are consistent with the Council's obligation to have regard to the New Zealand Heritage List/Rārangi Kōrero.
  - The provisions are appropriately supported by non-regulatory methods.
  - The costs associated with the proposed approach is reasonable in light of the benefits and the proposed approach provides a more efficient and effective method at protecting historic heritage from inappropriate subdivision, use, and development when compared to the status quo and the alternatives considered.

 The provisions are consistent with the Council's obligations to recognise and provide for the protection of historic heritage from inappropriate subdivision, use, and development under section 6(f) of the RMA. The provisions are also consistent with the Council's obligation to have regard to the matters under section 7(aa), (b), (c), (f), (g), and (i) of the RMA.

# 14 Attachment 3: Proposed definitions

# 15 Attachment 4: Historic heritage in the Regional Plan

The following table sets out the objectives and policies of the Natural Resources Plan for the Wellington Region which are of particular relevance to historic heritage.

Reference	Commer	nt		
Objective O27	Significa	nt historic heritage and its values are protected from		
	inapprop	priate modification, use and development.		
	This objective is similar to Objective 15 in the RPS.			
Policy P50	Managin value	ng adverse effects on sites with significant historic heritage		
	More tha	n minor adverse effects on the significant historic heritage		
	values ia	entified in Schedule E1 (heritage structures), Schedule E2		
	(wharves	s and boatsheds), Schedule E3 (navigation aids), Schedule E4		
	(archaed	ological sites) and Schedule E5 (freshwater heritage) shall be		
	avoided, remedied or mitigated by managing activities so t			
	(a)	significant historic heritage values are not lost, damaged or		
	(b)	destroyed,		
		effects are of a low magnitude or scale, or effects are reversible,		
	(c)	interconnections and linkages between sites are not		
		significantly altered or lost,		
-	(d)	previous damage to significant historic heritage values is		
		remedied or mitigated where relevant,		
	(e)	previous changes that have significant historic heritage		
		value in their own right are respected and retained,		
	(f)	adjacent significant historic heritage values are unlikely to		
		be adversely affected,		

	<ul> <li>(g) unique or special materials and/or craftsmanship are retained,</li> <li>(h) the activities do not lead to cumulative adverse effects on historic heritage.</li> <li>This policy provides direction for decision makers on activities that may have more than minor adverse effects on historic heritage items identified in Schedule E to the NRP.</li> </ul>
Policy P51	Appropriate demolition or removal
	Demolition, partial demolition or removal of a structure with significant historic heritage value identified in Schedule E1 (heritage structures), Schedule E2 (wharves and boatsheds), Schedule E3 (navigation aids), or Schedule E5 (freshwater heritage) is inappropriate except where: (a) the structure: (i) is substantially damaged by fire or natural hazard, or (ii) poses a significant risk to human safety, and (iii)it is not reasonably practicable to repair it; [] This policy provides direction for decision makers with respect to the demolition or removal of historic heritage structures identified in Schedule E to the NRP, noting that this is inappropriate except in the circumstances noted.
Rule R190	<ul> <li>Maintenance or repair or alteration of structures in Schedule E1,</li> <li>Schedule E2, and Schedule E3 – permitted activity</li> <li>This rule provides for the maintenance, repair, or alteration of identified heritage structures, wharves and boatsheds, and navigation aids as a permitted activity, subject to conditions that include using the same or similar materials in texture, form profile, design, and appearance.</li> <li>This rule applies in the coastal marine area only.</li> </ul>

Rule R191	Additions or alterations to structures identified in Schedule EI or
	Schedule E2 – restricted discretionary activity
	This rule provides that additions or alterations to identified heritage
	structures, wharves and boatsheds that are not a permitted activity
	are a restricted discretionary activity.
	This rule applies in the coastal marine area only.
Rule 192	Additions to structures identified in Schedule E3 – permitted activity
	This rule provides that additions or alterations to identified heritage
	navigation aids are a permitted activity, subject to conditions around
	the purpose and size of the addition.
	This rule applies in the coastal marine area only.
Rule 193	Additions or alterations to structures identified in Schedule E1,
	Schedule E2 or Schedule E3 – discretionary activity
	This rule provides that additions or alterations to identified heritage
	structures, wharves and boatsheds, or navigation aids that are not a
	permitted activity or restricted discretionary activity are a
	discretionary activity.
	This rule applies in the coastal marine area only.
Rule 194	Removal, demolition or replacement of structures or parts of
	structures identified in Schedule E1, Schedule E2 or Schedule E3 –
	discretionary activity
	This rule provides that removal, demolition, or replacement of
	identified heritage structures, wharves and boatsheds, or navigation
	aids is a discretionary activity.
	This rule applies in the coastal marine area only.
Schedule E1	Historic heritage structures

	This schedule sets out the historic heritage structures that are subject
	to rules R190, R191, R193, and R194.
	The sites in this schedule that are located adjacent to or within the
	Lower Hutt City territorial boundary are set out in the table below.
Schedule E2	Historic heritage wharves and boatsheds
	This schedule sets out the historic heritage wharves and boatsheds
	that are subject to rules R190, R191, R193, and R194.
	The sites in this schedule that are located adjacent to or within the
	Lower Hutt City territorial boundary are set out in the table below.
Schedule E3	Historic heritage navigation aids
	This schedule sets out the historic heritage navigation aids that are
	subject to rules R190, R192, R193, and R194.
	The sites in this schedule that are located adjacent to or within the
	Lower Hutt City territorial boundary are set out in the table below.
Schedule E4	Archaeological sites
	This schedule sets out archaeological sites within the region. The
	items in the schedule are not subject to any rules in the regional plan.
	The sites in this schedule that are located adjacent to or within the
	Lower Hutt City territorial boundary are set out in the table below.
Schedule E5	Historic heritage freshwater sites
	This schedule sets out sites and structures located within the beds of
	lakes and rivers that have significant historic heritage values. The
	items in the schedule are not subject to any rules in the regional plan.
	The sites in this schedule that are located adjacent to or within the
	Lower Hutt City territorial boundary are set out in the table below.

The following table sets out the items that are identified in Schedule E: Historic Heritage Items of the Natural Resources Plan for the Wellington Region that are located within or adjacent to the Lower Hutt City territorial boundary.

Name	Location	Included in PDP Schedule?	Comments	
Schedule E1: Historic	heritage structures			
Skerrett Boatshed	Lowry Bay, Eastbourne	Yes	Part located within coastal marine area; part located within territory.	
Schedule E2: Historic	heritage wharves and	d boatsheds		
Days Bay Wharf	Days Bay, Eastbourne	Yes	Part located within coastal marine area; part located within territory.	
Petone Wharf	Petone	Yes	Part located within coastal marine area; part located within territory.	
Point Howard Wharf	Point Howard, Seaview	No	The wharf has been demolished.	
Rona Bay Wharf	Rona Bay, Eastbourne	Yes	Part located within coastal marine area; part located within territory.	
Schedule E3: Historic heritage navigation aids				

Name	Location	Included in PDP Schedule?	Comments
Pencarrow Head Lighthouse	Pencarrow Head	No	Located within territory (not located within coastal marine area). Located within East Harbour Regional Park.
Schedule E4: Archae	ological sites		
Halcione Shipwreck (1896)	Fitzroy Bay	No	Located entirely within the coastal marine area.
Devon Shipwreck (1913)	Pencarrow Head	NO	Located entirely within the coastal marine area.
Hinds Point Wharf	Hinds Point	No	Archaeological remains. Not identified in Schedule E4, but identified on maps. Part located within coastal marine area; part located within territory.
Defender Shipwreck (1918)	Mokopuna Island	No	Located entirely within the coastal marine area.
Schedule E5: Historic	heritage freshwater	sites	

Name	Location	Included in PDP Schedule?	Comments
Big Huia Creek Intake	Big Huia Creek, Upper Orongorongo Catchment	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Korokoro Dam	Korokoro Stream, Belmont Regional Park, Petone	Yes	Located in Belmont Regional Park.
Little Huia Creek Intake	Little Huia Creek, Upper Orongorongo Catchment	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Morton Dam	Wainuiomata River, Reservoir Road, Wainuiomata	Yes	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Orongorongo River Weir & Intake	Orongorongo River (Upper Catchment)	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Orongorongo Water Supply Tunnel #1, East Portal	Orongorongo River (Upper Catchment)	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.

Name	Location	Included in PDP Schedule?	Comments
Orongorongo Water Supply Tunnel #1, West Portal	Orongorongo River (Upper Catchment)	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Orongorongo Water Supply Tunnel #2, East Portal	Orongorongo River (Upper Catchment)	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Orongorongo Water Supply Tunnel #2, West Portal	Reservoir Road, Wainuiomata	No	Located on land vested in Wellington Regional Council as general purpose reserve.
Petone Woollen Mills Weir	Korokoro Stream, Belmont Regional Park, Petone	No	Located in Belmont Regional Park.
Telephone Creek Intake	Telephone Creek, Upper Orongorongo Catchment	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.
Wainuiomata Waterworks Dam	Wainuiomata River, Reservoir Road, Wainuiomata	No	Located on land vested in Wellington Regional Council for water supply and recreation purposes.

The Council has considered Schedule E as follows:

- (132) Those items in Schedules E1 and E2 that traverse the boundary between the coastal marine area and the Council's territory are already included in the PDP Schedule of Heritage Buildings and Structures.
- (133) Lower Pencarrow Lighthouse, identified in Schedule E3, is located adjacent to the coastal marine area. It has not been included in the PDP Schedule of Heritage Buildings and Structures on the basis that it is located within a reserve managed by the Regional Council, and as such is not considered to be at risk of inappropriate subdivision, use, or development.
- (134) Items in Schedule E4 are generally located within the coastal marine area, outside of the Lower Hutt City Council's territory. As such they have not been included in the PDP Schedule of Heritage Buildings and Structures.
- (135) Items in Schedule E5 are generally freshwater infrastructure (including dams, intakes, pipes, and weirs). While Korokoro Dam, Morton Dam, and Wainuiomata Lower Dam are included in the PDP Schedule of Heritage Buildings and Structures, the remainder of items in Schedule E5 have not been included, as these are all located within reserves managed by the Regional Council, and as such are not considered to be at risk of inappropriate subdivision, use, or development.

# 16 Attachment 5: Analysis of district plans of adjacent territorial authorities

Plan	Relevant Provisions
Wellington City District Plan (operative in part 2024)	<ul> <li>The Wellington City District Plan is the most recently developed operative District Plan in the region with respect to historical heritage. The Plan includes:</li> <li>2 strategic objectives that recognise and provide for built heritage (HHSASM-Ol and HHSASM-O2)</li> <li>3 objectives for historic heritage, which include recognising historic heritage (HH-O1), protecting historic heritage (HH-O2), and sustainable long-term use (HH-O3)</li> <li>17 policies that contribute towards achieving the historic heritage</li> </ul>
	<ul> <li>objectives.</li> <li>The Historical Heritage chapter includes rules for both Heritage Buildings and Structures, and Heritage Areas. There are 13 rules for Heritage Buildings and Structures, which include rules for: <ul> <li>Maintenance and repair (HH-R1, permitted)</li> <li>Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and structures (HH-R2, permitted)</li> <li>Temporary works (HH-R3, permitted)</li> <li>Invasive seismic investigation (HH-R4, permitted)</li> <li>Replacement of single glazed windowpanes with clear double or triple glazed windowpanes (HH-R5, controlled)</li> </ul> </li> </ul>

Plan	Relevant Provisions
	<ul> <li>Relocation or total demolition of contributing buildings (HH-R23, restricted discretionary).</li> </ul>
	The rules only apply to the interior of a scheduled heritage building, where that building's interior is identified in the schedule.
	Rules for subdivision in relation to historic heritage are included in the subdivision chapter. Rules for infrastructure in relation to historic heritage are included in the Infrastructure – Other Overlays chapter. Rules for earthworks on the site of schedule heritage buildings and structures, and within heritage areas, are included in the earthworks chapter.
	The Plan also includes the following defined terms that relate to the interpretation of the Historical Heritage chapter:
	<ul> <li>Additions</li> <li>Alterations</li> <li>Built heritage</li> <li>Contributing buildings and structures</li> <li>Fabric</li> <li>Heritage area</li> <li>Heritage building</li> <li>Heritage structure</li> <li>Maintenance and repair</li> <li>Non-heritage building</li> <li>Partial demolition</li> <li>Seismic strengthening</li> <li>Total demolition</li> </ul>
Upper Hutt City District Plan (operative 2004)	<ul> <li>The Upper Hutt City District Plan includes two objectives for historic heritage, being:</li> <li>The protection of significant heritage features to promote continuity with the past (HH-OI); and</li> </ul>

Plan	Relevant Provisions			
	• Management of natural and physical resources takes into account the principles of the Treaty of Waitangi and has particular regard to kaitiakitanga (HH-O2).			
	There are 4 policies that contribute towards achieving these objectives.			
	The Historic Heritage chapter includes 3 rules that apply to scheduled significant heritage features, including:			
	<ul> <li>Repair or maintenance (HH-R1, permitted)</li> <li>Alteration or additions (HH-R2, controlled)</li> <li>Partial or total demolition (HH-R3, discretionary)</li> </ul>			
	The rules apply to both the exterior and interior of scheduled heritage buildings.			
	Rules for earthworks on sites containing a heritage feature are set out in the Earthworks chapter.			
	The Plan also includes the following defined terms that relate to the interpretation of the Historical Heritage chapter:			
	<ul> <li>Alteration or additions</li> <li>Repair or maintenance</li> <li>Partial or total demolition</li> </ul>			
Proposed Porirua City District Plan (decisions version	The Proposed Porirua District Plan was notified in 2020, with decisions made on submissions in December 2023. The Plan includes:			
2023)	<ul> <li>2 strategic objectives for historic and cultural heritage, being an objective to identify, protect, maintain, and where practicable enhance historic and cultural heritage (HCH- O1), and reflect the City's character and identity (HCH-O2)</li> </ul>			

Plan	Relevant Provisions		
	<ul> <li>2 objectives for historical heritage, including recognising historic heritage (HH-O1) and protecting historic heritage (HH-O2)</li> <li>17 policies that contribute towards achieving the objectives.</li> <li>The Historic Heritage chapter includes 11 rules that apply to</li> </ul>		
	scheduled heritage items and settings (being spatially defined areas around a heritage item), including:		
	<ul> <li>Repair, maintenance, and redecoration (HH-RI, permitted, restricted discretionary)</li> <li>Earthworks within the heritage setting of a scheduled heritage item (HH-R4, permitted, restricted discretionary)</li> <li>Repair, maintenance, redecoration, heritage restoration, earthquake strengthening, fire protection and accessibility upgrades, alterations, additions, repositioning, relocation, and demolition of structures or buildings in the heritage setting of a heritage item (HH-R5, permitted)</li> <li>Heritage restoration (HH-R6, controlled)</li> <li>Earthquake strengthening, fire protection, and accessibility upgrades (HH-R7, controlled)</li> <li>Earthquake strengthening, fire protection, and accessibility upgrades (HH-R7, controlled)</li> <li>New buildings or structures, or extending the footprint of an existing building or structure, in the heritage setting of a heritage item (HH-R8, restricted discretionary)</li> <li>Additions and heritage alterations (HH-R10, restricted discretionary)</li> <li>Repositioning (HH-R11, restricted discretionary)</li> <li>Relocation beyond the heritage setting (HH-R12, discretionary)</li> <li>Demolition of a Group B heritage item (HH-R13, discretionary)</li> <li>Demolition of a Group A heritage item (HH-R15, non-complying)</li> </ul>		

Plan	Relevant Provisions			
	The Historic Heritage chapter includes 6 rules that apply to scheduled heritage sites, including:			
	<ul> <li>Maintenance and heritage restoration (HH-R2, permitted)</li> <li>Animal grazing (HH-R3, permitted)</li> <li>Earthworks (HH-R4, permitted, restricted discretionary)</li> <li>New buildings or structures, or extending the footprint of an existing building or structure (HH-R9, restricted discretionary)</li> <li>Heritage alterations (HH-R10, restricted discretionary)</li> <li>Destruction (HH-R16, non-complying)</li> </ul>			
	There is also a default discretionary activity rule for any activity that is not otherwise provided for as permitted, restricted discretionary, discretionary, or non-complying (HH-R14).			
	The rules apply to both the exterior and interior of scheduled heritage buildings.			
	Rules for subdivision in relation to historic heritage are located in the subdivision chapter of the Plan.			
	The Plan also includes the following defined terms that relate to the interpretation of the Historical Heritage chapter:			
	<ul> <li>Demolition</li> <li>Heritage alteration</li> <li>Heritage item</li> <li>Heritage restoration</li> <li>Heritage setting</li> <li>Historic heritage site</li> <li>Maintenance</li> <li>Redecoration</li> <li>Repair</li> </ul>			

Plan	Relevant Provisions
Kapiti Coast	The Operative Kapiti Coast District Plan includes:
District Plan (operative 2021)	<ul> <li>A district-wide objective for historic heritage (DO-O7)</li> <li>District-wide objectives that apply to the Historic Heritage chapter include an objective for tangata whenua (DO-O1), and objective for development management (DO-O3), and the objective for historic heritage (DO-O7).</li> <li>9 policies contribute towards achieving these objectives.</li> </ul>
	The Historic Heritage chapter contains 8 specific rules that apply to scheduled historic buildings, historic structures, historic sites, and historic areas, including:
	<ul> <li>Repair and maintenance of scheduled historic buildings or structures (HH-R2, permitted)</li> <li>Repair and maintenance of schedule historic sites or areas (HH-R3, permitted)</li> <li>Alterations for earthquake strengthening (HH-R4, controlled)</li> <li>Alterations or additions (HH-R6, restricted discretionary)</li> <li>Relocation (HH-R8, discretionary)</li> <li>Partial demolition, demolition, or destruction (HH-R9, discretionary)</li> <li>Partial demolition, demolition, or destruction of a Heritage New Zealand listed item (HH-R10, non-complying)</li> <li>Relocation of a Heritage New Zealand Category 1 listed item (HH-R11, non-complying)</li> </ul>
	The Historic Heritage chapter also includes 3 general rules that provide that:
	<ul> <li>Unspecified activities that otherwise meet permitted activity standards are permitted activities (HH-R1)</li> <li>Activities specified as permitted or controlled, that breach permitted or controlled activity standards, are restricted discretionary (HH-R5)</li> </ul>

Plan	Relevant Provisions			
	<ul> <li>Activities specified as restricted discretionary, that breaches restricted discretionary activity standards, are discretionary (HH-R7)</li> </ul>			
	The rules apply to both the exterior and interior of scheduled heritage buildings.			
	Rules for earthworks in relation to historic heritage items are included in the Earthworks chapter. Rules for subdivision in relation to historic heritage items are included in the District Wide Subdivision Matters chapter.			
	The Plan also includes the following defined terms that relate to the interpretation of the Historic Heritage chapter:			
	<ul> <li>Additions</li> <li>Alterations</li> <li>Demolition</li> <li>Destruction</li> <li>Partial demolition</li> <li>Relocation</li> <li>Repair and maintenance</li> <li>Scheduled historic area</li> <li>Scheduled historic building</li> <li>Scheduled historic site</li> <li>Scheduled historic structure</li> </ul>			
Proposed Wairarapa Combined District Plan (proposed 2023)	<ul> <li>The Proposed Wairarapa Combined District Plan was publicly notified in October 2023. Hearings on submissions are planned to begin in late 2024. The Plan includes:</li> <li>1 strategic direction objective for the protection of heritage values (HC-OI)</li> </ul>			
	• 2 objectives in the Historic Heritage chapter, including an objective to recognise historic heritage (HH-O1), and an			

Plan	Relevant Provisions		
	<ul> <li>objective to protect historic heritage from inappropriate subdivision, use, and development (HH-O2)</li> <li>12 policies that contribute towards achieving these objectives.</li> <li>The Historic Heritage chapter contains 7 rules that apply to</li> </ul>		
	scheduled heritage buildings and items, including:		
	<ul> <li>Maintenance and repair (HH-R1, permitted)</li> <li>Demolition of a non-scheduled building or structure within heritage curtilage of a heritage building or item (HH-R2, permitted)</li> <li>Additions, alterations, and partial demolition (HH-R3, permitted, restricted discretionary)</li> <li>Heritage upgrade works (HH-R4, permitted, controlled)</li> <li>New or relocated buildings or structures within heritage curtilage of a heritage building or item (HH-R5, restricted discretionary)</li> <li>Relocation (HH-R6, discretionary)</li> <li>Demolition (HH-R7, discretionary)</li> </ul>		
	The Historic Heritage chapter also contains 4 rules that apply to		
	<ul> <li>scheduled heritage precincts, including:</li> <li>Maintenance and repair (HH-R8, permitted)</li> <li>Additions, alterations, and partial demolition (HH-R9, permitted, discretionary)</li> <li>Demolition or removal (HH-R10, discretionary)</li> <li>New or relocated buildings (HH-R11, discretionary)</li> </ul>		
	The rules apply to both the exterior and interior of scheduled heritage buildings, items, and areas, although interior alterations are a permitted activity.		
	The Plan also includes the following defined terms that relate to the interpretation of the Historic Heritage chapter:		

Plan	Relevant Provisions		
	Additions		
	Alterations		
	Heritage curtilage		
	Heritage upgrade works		
	Maintenance		
	• Repair		

The following table sets out the number of heritage buildings, structures and areas provided for in the schedules of each of the district plans described in the table above:

Plan	Scheduled Heritage Buildings and Structures	Scheduled Heritage Areas
Wellington City District Plan (operative in part 2024)	688 heritage buildings and structures	43 heritage areas
Upper Hutt City District Plan (operative 2004)	27 heritage features	-
Proposed Porirua City District Plan (decisions version 2023)	45 historic heritage items	8 historic heritage sites
Kapiti Coast District Plan (operative 2021)	111 historic heritage places	2 historic heritage areas
Proposed Wairarapa Combined District Plan (proposed 2023)	176 heritage buildings and structures (Masterton) 53 heritage buildings and structures (Carterton)	5 heritage precincts (Masterton) 4 heritage precincts (South Wairarapa)

Plan	Scheduled Heritage Buildings and Structures	Scheduled Heritage Areas
	180 heritage buildings and	
	structures (South

Section 32 Evaluation – HISTORICAL HERITAGE

#### 17 Attachment 6: New Zealand Heritage List / Rārangi Kōrero

The following table sets out the items on the New Zealand Heritage List/Rārangi Kōrero that are located within the Lower Hutt City territorial boundary.

Entry number	Name	Location	List entry type	Included in PDP schedule?
34	Pencarrow Lighthouse (Former)	Pencarrow Head	Historic Place Category 1	No
206	Petone Settlers Museum	The Esplanade, Petone	Historic Place Category 1	Yes
1322	Iona Memorial Cross	The Esplanade, Petone	Historic Place Category 2	Yes
1323	St Augustine's Church (Anglican)	12 Britannia Street, Petone	Historic Place Category 2	Yes
1324	Casa Loma	760 Western Hutt Road	Historic Place Category 2	Yes
1325	Christ Church (Anglican)	73 Eastern Hutt Road, Taita	Historic Place Category 1	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
1326	Orr House	132 Kings Crescent	Historic Place Category 2	Yes
1327	Lower Hutt Railway Station	499-509 Hutt Road	Historic Place Category 1	Yes
2886	Price's Folly	66 Sydney Street, 25 Campbell Terrace, Petone	Historic Place Category 2	Yes
2887	St David's Church (Presbyterian)	4 Britannia Street, Petone	Historic Place Category 2	Yes
2889	Lochaber	125 Western Hutt Road, Tirohanga	Historic Place Category 2	Yes
3575	Main Block, Wellesley College	Eastern Bays Marine Drive, Days Bay	Historic Place Category 2	Yes
3576	House	111 Marine Parade, Eastbourne	Historic Place Category 2	Yes
3577	Glenwood	287 Muritai Road, Eastbourne	Historic Place Category 2	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
3578	The Glen	283a Muritai Road, Eastbourne	Historic Place Category 2	Yes
3579	House	603A Marine Drive, Days Bay	Historic Place Category 2	Yes
3580	Skerrett Boat Shed	Eastern Bays Marine Drive, Lowry Bay	Historic Place Category 2	Yes
3581	Ford Motor Company Workshop	43 Seaview Road, Seaview	Historic Place Category 2	Yes
3582	House	2 Patrick Street, Petone	Historic Place Category 2	Yes
3583	House	4 Patrick Street, Petone	Historic Place Category 2	Yes
3584	House	8 Patrick Street, Petone	Historic Place Category 2	Yes
3585	House	10 Patrick Street, Petone	Historic Place Category 2	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
3586	House	14 Patrick Street, Petone	Historic Place Category 2	Yes
3587	House	16 Patrick Street, Petone	Historic Place Category 2	Yes
3588	House	18 Patrick Street, Petone	Historic Place Category 2	Yes
3589	House	19 Patrick Street, Petone	Historic Place Category 1	Yes
3590	House	22 Patrick Street, Petone	Historic Place Category 1	Yes
3591	House	24 Patrick Street, Petone	Historic Place Category 2	Yes
3592	House	43 Adelaide Street, Petone	Historic Place Category 2	Yes
3593	House	54 Adelaide Street, Petone	Historic Place Category 2	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
4140	Balgownie	16B Hamerton Street, Naenae	Historic Place Category 2	Yes
4141	Balgownie Generator Building	16A Hamerton Street, Naenae	Historic Place Category 2	Yes
4142	Coppelle Cottage	705 High St	Historic Place Category 2	Yes
4144	The Glebe	1 Fry Street and Boulcott Street	Historic Place Category 1	Yes
4145	Post Office (Former)	2-10 Andrews Avenue and 151 High Street	Historic Place Category 2	Yes
7028	Heretaunga Settlement Workers' Dwellings Historic Area	2, 4, 8, 10, 14, 16, 18, 19, 22, 24 Patrick Street and 43, 54 Adelaide Road, Petone	Historic Area	Yes
7185	Offices	64 Knights Rd	Historic Place Category 2	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
7190	Penrose	60 Penrose St	Historic Place Category 2	Yes
7199	The Crescent	49 Pretoria St	Historic Place Category 2	Yes
7310	Methodist Church and Cemetery	24 Coast Road, Wainuiomata	Historic Place Category 2	Yes
7369	Jackson Street Historic Area	Jackson Street, Petone	Historic Area	Yes
7424	Norbury	38 Normandale Road, Normandale	Historic Place Category 1	Yes
7474	Rona Bay Wharf	Rimu Street, Eastbourne	Historic Place Category 2	Yes
7479	Collett House	36 Riddlers Crescent, Petone	Historic Place Category 1	Yes
7508	Wainuiomata Historical Museum	Main Road and Homedale Road, Wainuiomata	Historic Place Category 2	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
7520	Lower Hutt Civic Centre Historic Area	Woburn Road, Queens Drive, Laings Road and Myrtle Street	Historic Area	Yes
7644	Eastbourne Borough Council Omnibus Service Garage (Former)	493-495 Muritai Road, Eastbourne	Historic Place Category 2	Yes
7711	Old Belmont to Pauatahanui Road	Belmont Road; Normandale Road, Belmont Regional Park	Historic Place Category 2	No
7742	Nash House	14 St Albans Grove	Historic Place Category 1	Yes
7757	Vogel House, Cottage and Grounds	75 Woburn Road	Historic Place Category 1	Yes
9319	Lower Hutt Central Fire Station (Former)	155-157 Waterloo Road	Historic Place Category 1	Yes
9438	ANZAC Memorial Flagpole	Hutt Road, Petone	Historic Place Category 1	Yes

Entry number	Name	Location	List entry type	Included in PDP schedule?
9439	Petone Magistrate's Court	13 Elizabeth Street, Petone	Historic Place Category 2	
9621	Baring Head/Ōrua- pouanui Historic Area	1580 Coast Road, Wainuiomata	Historic Area	Yes
9752	Petone Memorial Technical College (Former)	Weltec Petone Campus, 23 Kensington Avenue and Buick Street, Petone	Historic Place Category 2	Yes
9806	Naenae Post Office (Former)	27 Hillary Court, Naenae	Historic Place Category 1	Yes

## 18 Attachment 7: Summary of feedback – draft District Plan consultation

Issues raised by submitters	Response
Whether the District Plan should play a role in protecting historic heritage.	The RMA requires that District Plans protect historic heritage from inappropriate subdivision, use and development. At the same time, policy 22 of the RPS requires that District Plans in the Wellington Region to include policies, rules and/or other methods that protect the significant historic heritage values associated with places, sites and areas identified in accordance with policy 21 of the RPS. Because of this, the District Plan has a role to play in protecting significant historic heritage values, where these have been appropriately identified.
Heritage restrictions inhibit growth and drive up costs.	Rules that protect historic heritage can restrict development capacity on sites with scheduled heritage buildings or structures, or within scheduled heritage areas. Rules that protect historic heritage may also impose other costs, such as the cost of obtaining resource consent to undertake development, or insurance costs (such as an increased excess).

Issues raised by submitters	Response
	These costs can be justified in the context of the requirement that the District Plan protect significant historic heritage values.
Property owners should be allowed to modify, add, alter, or demolish their houses.	There are a range of circumstances where it may be appropriate to modify, add, alter, or even demolish buildings that have significant historic heritage values. The proposed District Plan sets out the circumstances where this will be appropriate.
Heritage listings should be at the discretion of the owner.	The Council is required to recognise and provide for the protection of historic heritage from inappropriate subdivision, use, and development, whether or not existing property owners support this. A similar requirement applies to other "matters of national importance" under section 6 of the RMA, including the management of significant risks from natural hazards. Notwithstanding this, the Council has considered the feedback provided by property owners when considering whether to include those properties in the proposed Schedule of Heritage Buildings and Structures. In some instances, this has led to a building or structure not being included in the proposed schedules.
Owners of heritage buildings should be compensated (such as by Council purchasing the property).	<ul> <li>The Council makes a range of financial support available to owners of scheduled heritage buildings or structures, including:</li> <li>Rates remission;</li> <li>Financial support from the Built Heritage Incentive Fund.</li> </ul>

Issues raised by submitters	Response
Concern that the Heritage Areas identified for Plan Change 56 have not been included in the draft District Plan.	The Council has proposed to include areas in the Schedule of Heritage areas where it is considered that there is sufficient evidence about significant historic heritage values to provide for those areas in the District Plan.
All buildings built prior to 1940 should be protected.	It would not be appropriate to protect buildings solely based on their age. Not all buildings built prior to 1940 will have heritage value.
Whether or not an item is scheduled should be informed by its physical condition and whether it is able to be maintained or repaired at a reasonable cost.	A range of factors are considered when identifying whether a place has significant historic heritage values. These factors are set out in Policy 21 of the Regional Policy Statement for the Wellington Region. The physical condition of existing buildings and structures may be a factor when considering whether there are significant historic heritage values (for example, where a building has been left to degrade to such an extent that physical features with significant values have already been lost).
Some properties cannot be seen from the street, and therefore have little to no value to the public.	While public visibility or accessibility of historic heritage can contribute to public appreciation of heritage values, the Council is required to protect historic heritage from inappropriate subdivision, use, and development even where it may not be visible to the wider public. This also ensures that historic heritage can be protected for future generations.
A greater level of new development should be permitted on sites with heritage buildings (for	The surroundings of a heritage building or structure, and its relationship to other buildings, can be an

Issues raised by submitters	Response
example, development of a new garage).	important contributing factor to the historic heritage significance of the building or structure. The proposed District Plan permits the development of small-scale accessory buildings on sites with existing heritage buildings or structures. However, the proposed District Plan requires resource consent for larger new buildings on sites with heritage buildings and structures so that their design and location can be considered in a manner that mitigates potential adverse effects on the historic heritage values of the scheduled building or structure.
Heritage buildings that are dangerous/insanitary, or do not meet Healthy Homes standards, should be able to be modified or demolished.	The proposed District Plan permits internal alterations and enables external alterations where these provide for seismic strengthening and fire and accessibility upgrades. This enables building owners to undertake works that would keep their buildings in a sound and sanitary condition. With respect to Healthy Homes standards, many of the modifications (such as installation of floor and ceiling insulation, or installation of a ground moisture barrier) can be undertaken without the need to modify the exterior of a heritage building.
Heritage interiors should be protected.	While the interior of some buildings may have heritage values, the Council considers that the overall heritage significance of heritage buildings is most effectively protected where those buildings are able to adapt to provide for the continued use of the building. The Council considers that restricting interior alterations would be contrary to achieving this outcome. It would also be difficult for the Council to monitor and enforce.

Issues raised by submitters	Response
Internal alterations should be enabled.	The proposed District Plan permits alterations to the interiors of scheduled heritage buildings and structures.
Concern that the justification and assessment on which heritage listings are based is not sufficiently robust.	The Council has engaged independent heritage experts to review the assessment methodology, and considers that the methodology and the level of information used to support the new buildings, structures and areas that are proposed to be added to the Schedules of Heritage Buildings, Structures, and Areas as part of this District Plan review is sufficiently robust to justify their listing.
Council should work with local iwi to protect Māori heritage, not just European heritage.	The Council has engaged with iwi on the recognition of historic heritage more broadly. Places or areas of significance to mana whenua are set out in the Sites and Areas of Significance to Māori chapter of the District Plan.
Concern that including a building in the Schedule of Heritage Buildings and Structures may mean that the building cannot be insured.	It is possible to obtain insurance cover for heritage buildings, with many common insurance policies include clauses specific to heritage buildings. The costs of insurance, and ability to obtain a policy, are likely to be determined by a range of physical factors including the age of the building, its size, construction materials and methods, and the presence of natural hazards. These factors are not altered by including the building in the Schedule of Heritage Buildings and Structures.
	The extent to which insurance cover is available for heritage buildings, the exclusions that may apply, and the additional costs associated with cover may vary depending on the policy. Notwithstanding this, it is clear that insurance policies are available for heritage

Issues raised by submitters	Response
	buildings in New Zealand. Refer to section 4.2.6 for further discussion on insurance and heritage buildings.
Concern that including a building in the Schedule of Heritage Buildings and Structures would prevent owners from undertaking energy efficiency upgrades, such as double glazing or rooftop solar panels.	The provisions have been amended to include a new rule that provides for retrofitting of double in existing window sashes and installation of rooftop solar panels where these are not visible from the street as a controlled activity (meaning that consent must be granted). A new policy has also been added to recognise the need for healthy and energy efficient heritage buildings by providing for alterations to heritage buildings that improve their energy efficiency or the health of the interior environment, where significant historic heritage values are protected.
Specific requests for additional buildings or areas to be considered for the Schedules of Heritage Buildings, Structures and Areas, or removed from the Schedules.	<ul> <li>The Council received a range of requests for:</li> <li>New buildings, structures, and areas to be added to the Schedules;</li> <li>Places or areas included in the draft District Plan schedules to be amended;</li> <li>Places or areas included in the draft District Plan schedules to be removed from the Schedules.</li> <li>Each request was reviewed by the Council and considered as part of the review of the proposed heritage inventory. Some buildings and structures were not included in the proposed Schedule of Heritage Buildings and Structures on the basis that there was insufficient evidence about the presence of significant historic heritage values. Other buildings and structures were retained within the proposed Schedule on the basis that there was sufficient evidence about significant historic heritage values. No buildings or</li> </ul>

Issues raised by submitters	Response
	structures were added to the Schedules that were not already included in the draft Schedules.
Wellington Water: concern that including the Morton Dam in the Schedule of Heritage Buildings and Structures may make it more difficult for Wellington Water to plan for the possible future development of bulk water storage infrastructure at the Wainuiomata water collection and treatment area. Concern was also raised with the non- complying activity status for total demolition of heritage buildings.	The policy for total demolition of heritage buildings and structures (HH-P11) has been amended to provide better recognition of infrastructure development. In particular, it has been amended to: Recognise that total demolition may be necessary to provide for the functional or operational need of the infrastructure. The policy now only requires reasonably practicable alternatives to demolition to be considered, rather than all alternatives. With respect to the activity status of total demolition, non-complying activity status is considered to be appropriate for total demolition on the basis that policy 22 of the RPS both seeks that significant historic heritage values are protected from inappropriate subdivision, use, and development, and total demolition would generally be contrary to this policy. Notwithstanding this, the amendments to policy HH-P11 provide a policy pathway that would allow a non- complying activity consent to be granted where this was necessary for the functional or operational needs of infrastructure. This provides for an appropriate balance between the need to protect significant historic heritage values (under policy 22 of the RPS) and the need to recognise the benefits of regionally significant infrastructure (under policy 7 of the RPS).
Te Whatu Ora   Health New Zealand: Concern	Based on the information gathered to date, the Hutt Hospital Clock Tower Building has sufficient heritage

Issues raised by submitters	Response
that including the Hutt Hospital Clock Tower	significance to be included in the proposed Schedule of Heritage Buildings and Structures. More information
Building in the Schedule	about the significance of these buildings can be found

and Structures would	number H147).
constrain the potential future development of healthcare facilities at the Hutt Hospital.	<ul> <li>However, it is recognised that the principal purpose of the Hospital Zone is to provide for the ongoing provision of healthcare services through hospitals and healthcare facilities. The policy for total demolition of heritage buildings and structures (HH-P11) has been amended to provide better recognition of this, by:</li> <li>Recognising that total demolition may be necessary to provide the purpose of the zone (which in the case of the hospital, is to provide for the ongoing provision of healthcare services through hospitals and healthcare facilities).</li> <li>Only requiring reasonably practicable alternatives to demolition to be considered,</li> </ul>
	rather than all alternatives. It is considered that this provides for an appropriate balance between protecting significant historic heritage values (in accordance with policy 22 of the RPS), while also allowing a policy pathway to grant consent for demolition of the Clock Tower Building where this is consistent with the providing for hospital or healthcare facilities, and where it has been demonstrated that there are no reasonably practicable alternatives to total demolition.

		would be incompatible with protecting historic heritage values from inappropriate use and development, because new buildings could be established on these sites without regard to those values.		
Sites in the Jackson Street Heritage Area where building height is limited (under standard HH-S1) to less than what is required by Policy 3 of the NPS-UD.	The protection of historic heritage from inappropriate subdivision, use, and development is a QM under section 771(a)	Policy 3(b) of the NPS-UD requires that building heights of at least 6 storeys is enabled within the Metropolitan Centre Zone (which the Council has generally provided for as 22 metres). Standard HH-S1 limits building height	Standard HH-SI limits building heights within the Jackson Street Heritage Area to 2 to 3 storeys. Without this standard, building could be developed up to 6 storeys. This means that the provisions would limit the	The total area of sites subject to these standards within the Metropolitan Centre Zone is approximately 5.1ha. This represents 9.6% of the total area of this zone.

Area	Why the area is subject to a QM	Why the QM is incompatible with the level of development permitted by the MDRS or Policy 3 of the NPS-UD	Assessment of the impact of limiting development capacity, building height, or density	Assessment of the costs and broader impacts of imposing those limits
	of the RMA and clause 3.32(1)(a) of the NPS-UD.	to 10 metres in the Jackson Street Heritage Area. Enabling 6-storey buildings within the Jackson Street Heritage Area would be incompatible with the historic heritage values of the area, which are in part derived from the generally consistent scale of 2 to 3 storey buildings within the area.	development capacity of sites in the Jackson Street Heritage Area by half (although this impact would only occur on sites where it would otherwise be feasible to develop to 6-storeys).	The costs and broader impacts of imposing these limits on achieving sufficient development capacity across the city will be minor, on the basis that the provisions impact only a minor proportion of the total area of commercial and mixed use zoned land that is subject to Policy 3 of the NPS-UD.
