Hi Saritha,

Please find my comments on the proposed model parameters below.

1. The GWRC Waiwhetu Model proposes to use a 1.59 m Sea Level Rise (SLR). The SLR for other models in the proposed re-runs is 1.0 m.
2. No justification on the difference is given in the memo, and it is inconsistent with the SLR on other models. We are unable to comment on this as a result.
3. We request that specific commentary is provided on this discrepancy if there is technical justification so that we can provide informed comments.

Cheers

LOUIS FREELAND
