Seaview Energy Resilience Project

Eastbourne Community Board Meeting

Project Background

- Fuel received via Seaview Wharf supplies fuel throughout lower North Island.

- The Seaview Energy Resilience Project will replace the existing fuel pipeline and upgrade the Seaview Wharf.

- This will enable these critical assets to be resilient to an earthquake and continue to provide this critical lifeline service.

- It also future-proofs this asset to changes in fuel types.

The project is being undertaken in three stages:

- Stage 1 – pipeline replacement, Point Howard to Port Rd (completed)

- Stage 2 – Seaview Wharf upgrade and pipeline replacement (underway)

- Stage 3 – onshore pipeline replacement (underway)

➢ Z Energy is leading the pipeline replacement (for pipeline owners).
➢ CentrePort are leading the wharf upgrade.

Stage 3–new pipeline in Port Road

Stage 3

- Port Road closed from Wednesday 23 April '25 for 3 months.
- Motor home waste dump station on Port Rd will be closed.
- North bound bus stop on corner of Seaview Rd and Port Rd will be closed.
- Access to Seaview Marina and all businesses maintained.
- Alternate routes for pedestrians and cyclists to be implemented.
- Electronic signage boards to be erected to warn of the closure.
- Vital that southbound traffic turn at Barnes St or Gracefield Rd.
- All affected businesses have been door knocked to discuss.
- When Port Road re-opens, a one-way system will be implemented which will remain in place until Xmas.
- Re-opening the road two-way traffic will be progressively implemented once all works have been completed.

Port Road Closure

Road closure

Port Road One Way System

Stage 2–Seaview Wharf Upgrade
