Nick Grainger

s7(2)(a)

Tēnā koe Nick,

Request for Information – Local Government Official Information and Meetings Act (LGOIMA) 1987

We refer to your official information request dated 11 May 2026, seeking information on public bicycle parking infrastructure within Hutt City Council's jurisdiction. Specifically, you requested:

1. *A list or dataset of all public bike parking locations managed, maintained, funded, or recorded by Hutt City Council.*
2. *The location information for each site, including coordinates where available.*
3. *The type of bike parking infrastructure at each location (for example: bike stands, lockers, covered parking, secure parking, etc).*
4. *Any recorded condition assessments, maintenance notes, inspection notes, or related metadata for each site, where available.*
5. *Details of any public e-bike charging locations.*
6. *Details of any public bicycle work stations or repair stations.*

We also note that you are happy for this information to be received in spreadsheet format.

Answer:

In response to your request, a single dataset of bicycle parking locations is attached in spreadsheet format.

This dataset has been compiled as part of an ongoing project to map bicycle parking infrastructure across the city. It includes location information (including coordinates where available). Locations in the dataset are identified using geographic coordinates only, as no corresponding street or site address information is held. It also includes descriptions of the type of infrastructure at each site, and a field indicating whether each location has been verified.

This dataset represents the most complete information currently available, and there is no single consolidated dataset of bicycle parking infrastructure across Council. While some locations have been confirmed through site visits or recent aerial imagery, a large proportion remain unverified. In many cases, unverified records are based on older data, and Council cannot confirm whether any changes have occurred since that information was recorded. As a result, the coordinates and associated information for unverified locations may be inaccurate. A “Verified” field has been included to distinguish between confirmed and unconfirmed records.

By way of context, bicycle parking infrastructure is generally low maintenance once installed and can remain in place for long periods without requiring active monitoring or regular updates, which contributes to some records remaining unverified.

Some entries in the dataset relate to bicycle parking that is not owned or managed by Council, such as infrastructure located at private sites. These have been included to support the broader mapping work and to provide a more complete picture of publicly accessible bicycle parking across the city.

You will note that two records in the dataset relate to “Locky Dock” facilities. Locky Docks are a form of secure bicycle parking installed at a small number of locations across the city. These facilities are designed to support both bike parking and e-bike charging. However, the dataset provided does not currently confirm which sites have charging functionality enabled as this information has not yet been verified as part of the wider data collection work. While publicly available information indicates that charging may be available at these sites,

Council does not hold a verified dataset that identifies e-bike charging locations in a consistent or complete way.

Council does not hold a separate, comprehensive dataset containing condition assessments, maintenance notes, or formal inspection records for bicycle parking infrastructure. Any descriptive or condition-related information available has been included in the attached dataset where it exists.

We are refusing the parts of your request relating to a comprehensive list of public e-bike charging locations, and public bicycle workstations or repair stations, under section 17(g) of the LGOIMA as this information is not held.

You have the right to seek an investigation and review by the Ombudsman of this response. Information about how to make a complaint is available at: [Office of the Ombudsman - Complaints](#), or freephone 0800 802 602.

Please note that this response to your information request may be published on Hutt City Council's website: [Proactive releases - Hutt City Council](#).

Ngā mihi nui
